Getting Skills Right: Training Supply for the Green and AI Transitions **Equipping Workers with the Right Skills** OECD, 2024-12-11. Adult learning systems are being called upon to prepare workers for major labour market shifts including the green transition and the rise of artificial intelligence (AI) in the workplace. While initial education is important, upskilling and reskilling the existing workforce is essential to help individuals and businesses adapt and prepare for these transitions. Policy makers face the challenge of ensuring training is both relevant and inclusive, yet there is limited understanding of whether current training supply is sufficient to meet current and future skill needs. Most research focuses on the demand for skills with little insight into the supply. To fill this gap, this report uses evidence from new OECD questionnaires and an analysis of training catalogues to evaluate whether current training supply aligns with the skills needed for the green and AI transitions. It also provides insight into the accessibility and flexibility of training efforts to guide policy makers in their efforts to develop more effective, inclusive training strategies.

to the World Economic Forum WEF However there s significant work being done to shift this tide Take for instance Michelle Lee the first female Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office USPTO reflects on her childhood Girl Scout badge in sewing and cooking and how that memory inspired to create an IP badge that exposes young women to the process of invention Social entrepreneur investor and Malala Fund co founder Shiza Shahid shares her efforts beginning from mentoring young women in Pakistan to her current work directing more investment to women innovators around the globe And Elizabeth Isele a senior fellow in Social Innovation at Babson College shares her research on women and ageism saying we need to retire the word retirement The book is divided into six parts each with unique areas of focus Millennials Leading Exploring Challenges and Opportunities Facing the Next Generation of Women in Technology Men and Women Empowering One Another Bold Leadership Women Changing the Culture of Investment and Entrepreneurship Educating for the 21st Century Breaking the Glass Ceiling A Generation of Women Forging into Technology Leadership Emerging Fields of Technology The Internet of Women gathers examples about the increasingly inclusive and progressive gender culture in technology from over 30 countries Stories range from an entrepreneur in Dubai partnering with private and public sector entities to accelerate blockchain technology to a young British woman moving to Silicon Valley to launch an artificial intelligence platform and incubator The book is intended for corporations academic institutions the private sector government agencies gender experts and the general public and its key benefit is to let the reader understand a path towards implementing diversity overall globally It also showcases the strategies tools and tactical execution on how create cultural change in all parts of the world *Popular Science* ,1954-02 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better [Informationweek](#) ,1998
