AI Aesthetics Jan-Noël Thon, Lukas R.A. Wilde, 2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aesthetics that identifies all kinds of embodied perception as its object The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged Considering its decidedly international and interdisciplinary scope *AI Aesthetics AI Generated Images between Artistics and Aesthetics* will appeal to scholars and students within media studies cultural studies literary studies philosophy art history visual culture studies digital humanities and critical AI studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
