

Leather Boots Tutorial by onunoxu

1. Lineart

Keep the lineart simple as the majority of the details will be painted in later steps.

2. Flat Color

Although the softer lineart mostly disappears around the edges, the details on the inside can still be seen.

3. Eyelets

I rarely use lineart for small metal pieces. This simplifies everything and looks cleaner.

4. Laces

I prefer to do the laces in two parts, as shown in blue and red. Having them separated this way makes it much easier to adjust later if needed as opposed to having them all on one layer.

5. Sheen

This can be done with either a very soft brush or a normal brush with some blur applied to the edges and reduced layer opacity. Grainy texture placed sparingly helps to break up the smoothness and adds interest.

6. Depth

Add an extra layer of depth by adding a darker outline around wherever the sheen is. This can be painted in by hand or done with an Outer Glow effect if your program supports that feature.
