

Aspect	Functional Requirements	Non-functional Requirements
Definition	Specifies what the system should do (actions and tasks).	Describes how well the system performs (quality attributes).
Purpose	To ensure the system performs necessary functions for users.	To ensure the system meets quality standards for performance, reliability, and usability.
Focus	Focuses on features and capabilities of the system.	Focuses on system quality and user experience.
Example	User login, data retrieval, payment processing.	Performance speed, system availability, security protocols.
Testing Method	Functional testing (to validate feature behavior).	Performance, security, and usability testing.
Measurement	Measurable through specific functions or actions.	Measured by quality attributes (e.g., response time, uptime).
Impact on Development	Defined early to shape core system functionality.	Often refined throughout development to ensure system stability and scalability.
Goal	To meet user and business needs for system capabilities.	To enhance user experience and ensure system robustness.
Importance	Provides essential functions to meet user requirements.	Ensures the system is efficient, reliable, and user-friendly.
