Hydrogen in Materials and Vacuum Systems Ganapati R. Myneni, Swapan Chattopadhyay, 2003-07-16 All papers were peer reviewed Hydrogen plays a key role in materials beneficial in some cases problematic in others In all such systems a detailed understanding of the hydrogen based interaction is necessary for control improvements and for possible new applications This hydrogen workshop proceeding incorporates contributions from semi conducting normal conducting metals and superconducting materials as well as vacuum communities who deal with the hydrogen materials issue The technical areas covered in these proceedings include hydrogen in materials hydrogen interactions and dynamics in semiconductors hydrogen adsorption storage generation and distribution hydrogen in niobium hydrogen in vacuum systems gaseous hydrogen accelerator structures and magnetically suspended liquid hydrogen transfer lines **Nondestructive Methods**

for Materials Characterization: George Y. Baaklini, Norbert Meyendorf, Theodore E. Matikas, Robert S. Gilmore, 2014-06-05 Characterization of material properties is critical for understanding the material's mechanical behavior and design performance under its operating conditions The necessity to characterize materials for a myriad of applications has spurred the development of many new methods and instruments However many of these tools require destructive sectioning of the material to provide characterization and do not provide key information about material parameters in their operating environments An ideal characterization tool would provide data about the material properties that affect micro and macro structural behavior without the need to destructively section the sample Such data can only be obtained using nondestructive evaluation NDE methodologies therefore NDE is essential for almost any advanced industrial product NDE offers the possibility to determine gauge material parameters and defects at nearly any point line surface or volume element of interest This book brings together researchers to focus and report on multidisciplinary approaches to solving materials characterization problems Topics include process control and deformation behavior via X ray techniques NDE for fracture fatigue and corrosion electric and dielectric NDE structure sensitive properties for NDE characterization NDE for silicon wafers and thin films and optical and infrared techniques Applied Mechanics Reviews, 1987 1975 *Ultrasonics Symposium Proceedings* John De Klerk, 1975 **Advanced Ceramics Report**, 1997 *International Aerospace Abstracts*, 1997 **Serials & Newspapers in Microform**, 1992 **Government Reports Announcements & Index**, 1995 **Nondestructive Methods for Materials Characterization**, 1999 PROCEEDINGS OF THE INTERDISCIPLINARY WORKSHOP ON NONDESTRUCTIVE TESTING MATERIALS CHARACTERIZATION, ,
