Informationstechnologien und die zunehmende Verfügbarkeit von Daten angestoßen wurden. Aufgrund dieser neuen Ansätze werden eine Reihe von Phänomenen zum Beispiel aus den Sozial- oder den Lebenswissenschaften berechenbar, die zuvor als zu komplex für eine wissenschaftliche Analyse galten. Der Band versammelt Texte aus einer Vielzahl unterschiedlicher Perspektiven von der Physik über die Sozial- und Kulturwissenschaften bis hin zur Informatik. Neben Beiträgen, die die aktuellen Entwicklungen direkt thematisieren, untersuchen andere Aufsätze zentrale Begriffe in unmittelbarem Zusammenhang wie Komplexität oder Information.

Nonlinear Science And Complexity - Proceedings Of The Conference Albert C J Luo, Liming Dai, Hamid R Hamidzadeh, 2006-12-09. This volume provides useful tools in Lie group analysis to solve nonlinear partial differential equations. Many of important issues in nonlinear wave dynamics and nonlinear fluid mechanics are presented. Homotopy techniques are used to obtain analytical solutions fundamental problems and theories in classic and quantum dynamical systems are discussed and numerous interesting results about dynamics and vibration in sensor and smart systems are presented. Interval computation and nonlinear modeling in dynamics and control are also briefly included.

Nonlinear Dynamics in Equilibrium Models John Stachurski, Alain Venditti, Makoto Yano, 2012-01-25. Optimal growth theory studies the problem of efficient resource allocation over time, a fundamental concern of economic research. Since the 1970s the techniques of nonlinear dynamical systems have become a vital tool in optimal growth theory, illuminating dynamics and demonstrating the possibility of endogenous economic fluctuations. Kazuo Nishimura's seminal contributions on business cycles, chaotic equilibria and indeterminacy have been central to this development, transforming our understanding of economic growth cycles and the relationship between them. The subjects of Kazuo's analysis remain of fundamental importance to modern economic theory. This book collects his major contributions in a single volume. Kazuo Nishimura has been recognized for his contributions to economic theory on many occasions, being elected fellow of the Econometric Society and serving as an editor of several major journals. Topics in Applied Mechanics J.F. Dijkman, F.T. Nieuwstadt, 2012-12-06. In collaboration with the Contact Group Experimental Mechanics in The Netherlands and under the auspices of the Technological Institute of the Koninklijke Vlaamse Ingenieurs Vereniging, Royal Flemish Society of Engineers, the Department of Applied Mechanics of the Koninklijk Instituut van Ingenieurs, Royal Institution of Engineers in The Netherlands, organised the second National Mechanics Congress in The Netherlands on November 16-18, 1992. About hundred participants from universities and industrial research laboratories in The Netherlands and Belgium discussed topics around the theme Building Bridges: Integration of Theory and Applications in Applied Mechanics. Building bridges is of course one of the main tasks of a civil engineer in order to improve the infrastructure of our society. Strength, stiffness and stability have to be guaranteed for a large number of years of service. Localised effects such as shear lag in longitudinal stiffeners, small cracks in concrete structures and effects of corrosion may

on the long tenn lead to catastrofic failure of bridges During the congress J P Gailliez presented a talk about the hydraulic ship lifts in the Canal du Centre in south Belgium Built more than a hundred years ago the elevators still are in a perfect condition and are recognized now as an industrial archeological monument

Towards an Information Theory of Complex Networks Matthias Dehmer, Frank Emmert-Streib, Alexander Mehler, 2011-08-26 For over a decade complex networks have steadily grown as an important tool across a broad array of academic disciplines with applications ranging from physics to social media A tightly organized collection of carefully selected papers on the subject Towards an Information Theory of Complex Networks Statistical Methods and Applications presents theoretical and practical results about information theoretic and statistical models of complex networks in the natural sciences and humanities The book s major goal is to advocate and promote a combination of graph theoretic information theoretic and statistical methods as a way to better understand and characterize real world networks This volume is the first to present a self contained comprehensive overview of information theoretic models of complex networks with an emphasis on applications As such it marks a first step toward

establishing advanced statistical information theory as a unified theoretical basis of complex networks for all scientific disciplines and can serve as a valuable resource for a diverse audience of advanced students and professional scientists While it is primarily intended as a reference for research the book could also be a useful supplemental graduate text in courses related to information science graph theory machine learning and computational biology among others *Neural Information Processing* Nikil R. Pal, Nikola Kasabov, Rajani K. Mudi, Srimanta Pal, Swapan K. Parui, 2004-10-29 It is our great pleasure to welcome you to the 11th International Conference on Neural Information Processing ICONIP 2004 to be held in Calcutta ICONIP 2004 is organized jointly by the Indian Statistical Institute ISI and Jadavpur University JU We are confident that ICONIP 2004 like the previous conferences in this series will provide a forum for fruitful interaction and the exchange of ideas between the participants coming from all parts of the globe ICONIP 2004 covers all major facets of computational intelligence but of course with a primary emphasis on neural networks We are sure that this meeting will be enjoyable academically and otherwise We are thankful to the track chairs and the reviewers for extending their support in various forms to make a sound technical program Except for a few cases where we could get only two review reports each submitted paper was reviewed by at least three referees and in some cases the revised versions were again checked by the referees We had 470 submissions and it was not an easy task for us to select papers for a four day conference Because of the limited duration of the conference based on the review reports we selected only about 40% of the contributed papers Consequently it is possible that some good papers are left out We again express our sincere thanks to all referees for accomplishing a great job In addition to 186 contributed papers the proceedings includes two plenary presentations four invited talks and 18 papers in four special sessions The proceedings is organized into 26 coherent topical groups *Advances in Mechanical Design* Jianrong Tan, Feng Gao, Changle Xiang, 2017-11-14 Focusing on innovation these proceedings present recent advances in the field of mechanical design in China and offer researchers scholars and scientists an international platform to present their research findings and exchange their ideas In the context of the Made in China 2025 development strategy one central aspect of the ICMD2017 was Innovative Design Pushes Made in China 2025 The book highlights research hotspots in mechanical design such as design methodology green design robotics and mechanics and reliability design while also combining industrial design and mechanical design
