

A wide-angle photograph of a snowy mountain landscape under a clear blue sky. In the middle ground, three cross-country skiers are visible, moving across a snow-covered slope. The skier on the left is wearing a red jacket and blue pants. The middle skier is wearing a dark jacket and dark pants. The skier on the right is wearing a blue jacket and dark pants. They are all using ski poles. The background shows rolling snow-covered hills and a clear blue sky.

Nordic Notes Articles On Cross Country Skiing:

Nordic Notes Stuart Montgomery, 2015-10-30 *Nordic Notes* is a collection of wide ranging articles on cross country skiing. Some are about technique and equipment, some are about touring and some are about fitness and training. Many others are about topics of general interest: skiing with kids, skiing with blind people, navigating, travelling in ancient snow cats, Nordic walking, Scott of the Antarctic, things to see in the sky and things to be afraid of in Lillehammer. The author worked for 25 years in ski travel, organising and leading holidays in the Alps, Pyrenees and Scandinavia. **Snow Country**, 1992-11. In the 87 issues of *Snow Country* published between 1988 and 1999, the reader can find the defining coverage of mountain resorts, ski technique and equipment, racing, cross country, touring and the growing sport of snowboarding during a period of radical change. The award-winning magazine of mountain sports and living tracks the environmental impact of ski area development and people moving to the mountains to work and live. *Sport Bibliography*, 1983. *Landscape and Nature in Scandinavian Art* MaryClaire Pappas, Tonje Haugland Sørensen, 2025-04-16. This edited volume foregrounds new and vital scholarship shaping Scandinavian art historical research on the representations of the natural world. Contributors deconstruct the interlinking of people and land through critical readings of the Scandinavian representation of nature, bringing to the fore how the traditional focus on the landscape as a manifestation of temperament has tended to obfuscate critical approaches to the representation of the landscape. Making interdisciplinary connections, this volume redresses the imbalance in scholarship on the region that often emphasizes teleological national narratives and instead situates encounters with nature and the landscape in relationship to more interdisciplinary perspectives. Each chapter serves as a specific case study on topics ranging from circumpolar exploration and colonial practices, deconstructing National Romanticism myths and contemporary artistic responses to the history of the politics of land. The book will be of interest to scholars working in art history, visual culture, nature studies and environmental history. **Nordic urban nature recreation** Scott Cole, Henrik Lindhjem, Marianne Zandersen, Ioannis Angelidis, David N. Barton, 2018-05-25. The Nordic countries continue to experience growth of urban areas which provides benefits like economic growth but also imposes economic costs in terms of reduced ecosystem services. This report focuses on urban nature recreation and highlights economic methods and data that can help capture the associated nonmarket welfare benefits. The study stresses the need to collect user data to better understand visitation patterns which can be combined with valuation methods to provide evidence of economic benefits associated with e.g. hiking, cycling, skiing, paddling and other recreation activities. Once these benefits are visible, decision makers will have a better basis to balance economic growth with the environmental costs it imposes on urban ecosystem services. *News of Norway*, 1976. **Everyone to Skis!** William D. Frank, 2013-10-31. Nowhere in the world was the sport of biathlon a combination of cross country skiing and rifle marksmanship taken more seriously than in the Soviet Union and no other nation garnered greater success at international venues. From the introduction of modern biathlon in 1958 to the USSR's

demise in 1991 athletes representing the Soviet Union won almost half of all possible medals awarded in world championship and Olympic competition Yet more than sheer technical skill created Soviet superiority in biathlon The sport embodied the Soviet Union s culture educational system and historical experience and provided the perfect ideological platform to promote the state s socialist viewpoint and military might imbuing the sport with a Cold War sensibility that transcended the government s primary quest for post war success at the Olympics William D Frank s book is the first comprehensive analysis of how the Soviet government interpreted the sport of skiing as a cultural ideological political and social tool throughout the course of seven decades In the beginning the Soviet Union owned biathlon and so the stories of both the state and the event are inseparable Through the author s unique perspective on biathlon as a former nationally ranked competitor and current professor of Soviet history Everyone to Skis will appeal to students and scholars of Russian and Soviet history as well as to general readers with an interest in skiing and the development of twentieth century sport *Skiing* ,1971 **Ski** ,1973-01
