*Behavior Dynamics in Media-Sharing Social Networks* H. Vicky Zhao,W. Sabrina  
 Lin,K. J. Ray Liu,2011-04-14 In large scale media sharing social networks where millions of users create share link and reuse  
 media content there are clear challenges in protecting content security and intellectual property and in designing scalable  
 and reliable networks capable of handling high levels of traffic This comprehensive resource demonstrates how game theory  
 can be used to model user dynamics and optimize design of media sharing networks It reviews the fundamental  
 methodologies used to model and analyze human behavior using examples from real world multimedia social networks With a  
 thorough investigation of the impact of human factors on multimedia system design this accessible book shows how an  
 understanding of human behavior can be used to improve system performance Bringing together mathematical tools and  
 engineering concepts with ideas from sociology and human behavior analysis this one stop guide will enable researchers to  
 explore this emerging field further and ultimately design media sharing systems with more efficient secure and personalized  
 services
