

Regular manual cleaning

Mimaki printers have several onboard features to keep the machines running optimally. Some areas cannot be cared for automatically by the printer. It is important to continue the daily printer maintenance even when the printers are idle. If daily maintenance is not possible, once-a-week maintenance and cleaning will help supplement onboard cleaning routines. For those customers who will not have access to the printer, or are temporarily closing, please see long term storage below.

Capping Station and Wiper Maintenance

The wiper and cap surfaces are the most critical cleaning systems in the printer. These items are responsible for maintaining and cleaning the print head surface. Keep these areas clean and free of debris or ink buildup.

Running Test Prints

Running a weekly test print will help us identify any potential errors before they become significant problems. If you can inspect a weekly test print, please report any unusual output to your Mimaki Dealer or contact us directly at 888-530-3992.

Mimaki Cutting Plotters and Print/Cut units

Mimaki cutting products require very little maintenance. These machines can be safely turned off and unplugged for long periods.

The cutting heads on our print/cut machines also require little to no maintenance. Please follow our other guidelines to maintain the print heads on these units.

Enabling Automated Cleaning

The automated cleaning functions on Mimaki products are all enabled out of the box. The printers maintain the print head surface, ink discharge path, and recirculation systems according to internal schedules. This maximizes both production quality and print head life.
