Empire of AI Karen Hao, 2025-05-20 A NEW YORK TIMES BESTSELLER An eye opening account of the tech arms race shaping out planet from an award winning journalist and AI insider to the world of Sam Altman and OpenAI When longtime AI expert and journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission it was meant its leader Sam Altman told us to act as a check against more purely market forces But the core truth of this massively disruptive sector is that it requires an unprecedented amount of proprietary resources the compute power of scarce high end chips the sheer volume of data that needs to be amassed at scale the humans on the

ground cleaning it up for sweatshop wages throughout the Global South and a truly alarming spike in the need for energy and water underlying everything We have entered a new ominous age of empire with OpenAI setting a breakneck pace as a small group of the most valuable companies in human history try to chase it down In exhilarating prose and with unparalleled access to those closest to Sam Altman Hao recounts the meteoric rise of OpenAI and shows us the sinister impact that this industry is having on society

AI Futures Evgeny Morozov, 2025-04-29 A sober assessment of AI today and a bold vision for what it could be Generative AI tools released by a handful of rich tech companies are remaking the economy society and human life as we know it Must their vision be our common destiny Leading a forum acclaimed technology writer Evgeny Morozov author of *To Save Everything Click Here* and host of the podcast *A Sense of Rebellion* takes a hard look at Silicon Valley's grip on our technological imagination The prevailing wisdom says we can be complacent realists erecting a few guardrails around Big Tech or else total refuseniks rejecting this new technology altogether That false choice runs roughshod over history Morozov argues and with it a more utopian vision of the role technology can play in our lives To sketch a better AI future Morozov takes us back to the past showing how a radically different way of thinking about artificial intelligence

kinds of other activities better than humans ever could But was this goal actually achievable And if reached would it lead to our liberation or our subjugation Vauhini Vara an award winning tech journalist and editor had long been grappling with these questions In 2021 she asked a predecessor of ChatGPT to write about her sister s death resulting in an essay that was both more moving and more disturbing than she could have imagined It quickly went viral The experience revealing both the power and the danger of corporate owned technologies forced Vara to interrogate how these technologies have influenced her understanding of her self and the world around her from discovering online chat rooms as a preteen to using social media as the Wall Street Journal s first Facebook reporter to asking ChatGPT for writing advice while compelling her to add to the trove of human created material exploited for corporations financial gain Interspersed throughout this investigation are her own Google searches Amazon reviews and the other raw material of internet life including the viral AI experiment that started it all Searches illuminates how technological capitalism is both shaping and exploiting human existence while proposing that by harnessing the collective creativity that makes humans unique we might imagine a freer more empowered relationship with our machines and ultimately with one another
