Timothy Maude, 1999 Tim Maude knows investing and he knows the Internet He has compiled a list of trustworthy Internet sites for the investor who goes online The guts of the book is the listings and reviews of thousands of Interact investing sites designed to help the cyber investor gather trustworthy information **The Software Encyclopedia**, 1997 **Tax Notes International**, 2005 *I Remember Me* Josephine Ross, 2011 This volume investigates mnemonic self reference effects in preschoolers referring to memory recall of stimuli as a function of the depth of mental processing It explores a series of 7 experiments exploring the role of self in 3 and 4 year olds event memory This effect is thought to be based on the organizational properties of a highly elaborated self concept and so offers a clear route to study the child s developing sense of self However very few studies have investigated the origin and the development of this effect New evidence is provided to suggest that preschool children like adults show a mnemonic advantage for material that has been physically linked with the self through performance of a depicted action Experiment 1 Moreover 3 and 4 year olds show a bias for material that has been visually and linguistically processed with the self image Experiments 2 3 4 and material that has been socio cognitively linked to the self in terms of ownership Experiments 5 6 7 The data imply that both bottom up kinesthetic feedback self concept and top down attention aspects of self reflection may play a supporting role in early event memory perhaps representing a nascent form of autobiographical processing Importantly this research highlights a promising methodology for elucidating the executive role of the self in cognition *Connecting to Customers* Harry M. M. Eddy, Patricia J. Bauer, 2013-07-10 Children with incarcerated parents are at risk for a variety of problematic outcomes yet research has rarely examined protective factors or resilience processes that might mitigate such risk in this population In this volume we present findings from five new studies that focus on child or family level resilience processes in children with parents currently or recently incarcerated in jail or prison In the first study empathic responding is examined as a protective factor against aggressive peer relations for 210 elementary school age children of incarcerated parents The second study further examines socially aggressive

behaviors with peers with a focus on teasing and bullying in a sample of 61 children of incarcerated mothers Emotion regulation is examined as a possible protective factor The third study contrasts children s placement with maternal grandmothers versus other caregivers in a sample of 138 mothers incarcerated in a medium security state prison The relation between a history of positive attachments between mothers and grandmothers and the current cocaregiving alliance are of particular interest The fourth study examines coparenting communication in depth on the basis of observations of 13 families with young children whose mothers were recently released from jail Finally in the fi fth study the proximal impacts of a parent management training intervention on individual functioning and family relationships are investigated in a diverse sample of 359 imprisoned mothers and fathers Taken together these studies further our understanding of resilience processes in children of incarcerated parents and their families and set the groundwork for further research on child development and family resilience within the context of parental involvement in the criminal justice system
