CINEMA INDUSTRY AND ARTIFICIAL INTELLIGENCE DREAMS prof. IBRAHIM ELNOSHOKATY, The learning Machine can write like Shakespeare; yes, it can do that, but how can it do the same wording, the same style, but create an emotional story or play can it, or humans can like that, or any passed-away writer can? The scientists create text-to-text deep learning machine learning from all of his production style, wording, pattern, plot form, and his own character. It's easy to do that; right now, it is the Eternity to be or not to be that is the problem.

[Transforming our World Through Design, Diversity and Education](#) Gerald Craddock, Cormac Doran, Larry McNutt, Dónal Rice, 2018-10-15 Good design is enabling, and each and every one of us is a designer. Universal Design is widely recognized as an important concept that should be incorporated in all person-centred policies. The United Nations Convention on the Rights of Persons with Disabilities (UNCPRD) clearly stipulates that the most effective way of delivering on the promise of an inclusive society is through a Universal Design approach. Sitting at the intersection of the fields of Higher Education and Universal Design, this book presents papers delivered at the Universal Design and Higher Education in Transformation Congress (UDHEIT2018) held in Dublin, Ireland, from 30 October to 2 November 2018. This event brings together key experts from industry, education, and government and non-government organization sectors to share experiences and knowledge with all participants. The 86 papers included here are grouped under 17 headings or themes ranging from education and digital learning through healthcare to engagement with industry and urban design. Celebrating and integrating all that is good in design, diversity, and education, this book will be a valuable
