At an increasing rate, people are turning their homes into state-of-the-art machines complete with more switches, sensors, and actuators than you can shake a stick at. Whether you want to equip your home with motion detectors for added security, install computer-controlled lights for optimum convenience, or even mount an in-home web cam or two purely for entertainment, the world is now your oyster. Ah, but like anything highly technical, creating a smart home is typically easier said than done. Thankfully, *Smart Home Hacks* takes the guesswork out of the process. From what to purchase to how to use your remote control, it's the ultimate guide to understanding and implementing complete or partial home automation.
