Apple Inc. has released its latest piece of technology in the form of the Apple Watch. Available to the public since late April 2015, the new device has received rave reviews and has been applauded for its introduction of what has been deemed to be innovation at its best. Each of the available watches is accompanied by a magnetic charging cable, quick start guide, two same design bands, and a USB power adapter. The new device is compatible with iPhone models 5 and newer versions. The watch can operate via iPhone's Wi-Fi or 4G LTE. This particular feature contributes to reduced battery use for the user. The Apple Watch is a combination of two new types of technology currently only available in the new Apple Watch. Force Sensitive Retina display offers users 272 x 340, 312 x 390 resolutions. It is designed to enable a distinction between tapping and pushing. The Taptic Engine is a direct actuator and allows the user to experience tactile sensations for notifications, messages, incoming calls, or alerts.
