Cyberwars in the Middle East Ahmed Al-Rawi, 2021-07-16 Cyberwars in the Middle East argues that hacking is a form of online political disruption whose influence flows vertically in two directions top bottom or bottom up or horizontally These hacking activities are performed along three political dimensions international regional and local Author Ahmed Al Rawi argues that political hacking is an aggressive and militant form of public communication employed by tech savvy individuals regardless of their affiliations in order to influence politics and policies Kenneth Waltz s

structural realism theory is linked to this argument as it provides a relevant framework to explain why nation states employ cyber tools against each other On the one hand nation states as well as their affiliated hacking groups like cyber warriors employ hacking as offensive and defensive tools in connection to the cyber activity or inactivity of other nation states such as the role of Russian Trolls disseminating disinformation on social media during the US 2016 presidential election This is regarded as a horizontal flow of political disruption Sometimes nation states like the UAE Saudi Arabia and Bahrain use hacking and surveillance tactics as a vertical flow top bottom form of online political disruption by targeting their own citizens due to their oppositional or activists political views On the other hand regular hackers who are often politically independent practice a form of bottom top political disruption to address issues related to the internal politics of their respective nation states such as the case of a number of Iraqi Saudi and Algerian hackers In some cases other hackers target ordinary citizens to express opposition to their political or ideological views which is regarded as a horizontal form of online political disruption This book is the first of its kind to shine a light on many ways that governments and hackers are perpetrating cyber attacks in the Middle East and beyond and to show the ripple effect of these attacks *iWar* Tim Higgins, 2025-09-18 From the boardrooms to the court rooms this is the gripping story of how Apple became the world's most valuable company and of the lawmakers and entrepreneurs determined to knock it off its pedestal Since the invention of the iPhone and App Store Apple has built a near unassailable market power controlling not only commerce but also culture and increasingly the flow of ideas In response a loose rebel alliance of tech entrepreneurs has formed to lay siege to Apple bringing together Epic Games Tim Sweeney Spotify's Daniel Ek X's Elon Musk and WeChat's Pony Ma In the trenches of popular opinion and now in the courtrooms of Europe and the United States this rebellion aims to tear down Apple's walls and dismantle its alleged monopoly *iWar* weaves together the story of Apple's rise and reign with the political and international forces arrayed against it in the fight over control of the global digital economy The stakes couldn't be higher
