feedback shift registers non linear combinations of LFSRs algebraic attacks and irregular clocked shift registers Part II studies some special ciphers including the security of mobile phones RC4 and related ciphers the eStream project and the blum blum shub generator and related ciphers Stream Ciphers requires basic knowledge of algebra and linear algebra combinatorics and probability theory and programming Appendices in Part III help the reader with the more complicated subjects and provides the mathematical background needed It covers for example complexity number theory finite fields statistics combinatorics Stream Ciphers concludes with exercises and solutions and is directed towards advanced undergraduate and graduate students in mathematics and computer science
