to lose 10kgs in a week but what's the point of losing it if you're going to put it back on? What you really need to focus on when trying to lose weight is making small healthy changes that remain with you forever. Educate yourself on what's good for you, what's bad for you, what you should consume more of and what you should consume less of and start incorporating these into your daily life. It might be hard at first but you can do it. Even if you only change one small habit a week by adding something that's good for you and eliminating something that's bad for you. Even if it takes you twelve months to get yourself into a healthy life long eating plan at least in 12 months you will be there. Remember the one thing that we have no control over is time. It is the one variable that can never be controlled. 12 months from reading this article is going to be 12 months from reading this article no matter which way you look at it. You cannot change that. However what you are doing and where you will be when that 12 month mark arrives is the variable that can be controlled. What you do within that 12 months is controlled entirely by you. You can either be in the same situation or you can slowly chip away at what can appear to be an impossible task so that by the time the inevitable arrives you are in a completely different situation. The choice is yours and it's time to take control. Regardless of your current situation when it comes to healthy eating it's never too early and it's never too late.
