Ai Overview Cyber Monday Today:

AI-Driven Cybersecurity Hooman Razavi, Mariya Ouaissa, Mariyam Ouaissa, Haïfa Nakouri, Ahmed Abdelgawad, 2025-09-26 This book delves into the revolutionary ways in which AI driven innovations are enhancing every aspect of cybersecurity from threat detection and response automation to risk management and endpoint protection As AI continues to evolve the synergy between cybersecurity and artificial intelligence promises to reshape the landscape of digital defence providing the tools needed to tackle complex ever evolving cyber threats Designed for professionals researchers and decision makers this book emphasizes that understanding and leveraging AI in cybersecurity is not just advantageous it is essential for building robust future proof defences in a world where digital security is paramount **Artificial Intelligence in Internet of Things (IoT): Key Digital Trends** Frank Lin, David Pastor, Nishtha Kesswani, Ashok Patel, Sushanta Bordoloi, Chaitali Koley, 2024-10-16 This book is a collection of high quality research papers presented at 8th International Conference on Internet of Things and Connected Technologies ICIoTCT 2023 held at National Institute of Technology NIT Mizoram India during 29 30 September 2023 This book presents recent advances on IoT and connected technologies This book is designed for marketing managers business professionals researchers academicians and graduate level students seeking to learn how IoT and connecting technologies increase the amount of data gained through devices enhance customer experience and widen the scope of IoT analytics in enhancing customer marketing outcomes *Combating Cyberbullying With Generative AI* Reddy C., Kishor Kumar, Malhotra, Meetu, Ouaissa, Mariya, Hanafiah, Marlia Mohd, Shuaib, Mohammed, 2025-01-31 Cyberbullying is a pervasive global issue that threatens mental health particularly among young people with alarming rates of victimization Emerging technologies like generative AI offer powerful tools to detect prevent and mitigate harmful online behavior addressing this critical societal challenge The use of machine learning and natural language processing enables early identification of offensive content though ethical considerations and privacy concerns remain vital Advancing AI driven solutions to combat cyberbullying has the potential to create safer digital environments fostering well being and inclusivity online These efforts not only bridge a significant research gap but also empower stakeholders to develop responsible effective strategies against online abuse Combating Cyberbullying with Generative AI emphasizes the creative ability of generative AI to generate innovative solutions that are tailored to the issues faced in cyberbully detection It presents case studies and practical examples that demonstrate effective merging of generative AI in cyberbullying space providing readers with applicable knowledge and motivation to implement these technologies in their situations Covering topics such as creativity intelligent systems and social platforms this book is an excellent resource for scholars researchers professionals practitioners and more Artificial Intelligence and Cybersecurity Tuomo Sipola, Tero Kokkonen, Mika Karjalainen, 2022-12-07 This book discusses artificial intelligence AI and cybersecurity from multiple points of view The diverse chapters reveal modern trends and challenges related to the use of artificial intelligence when

considering privacy cyber attacks and defense as well as applications from malware detection to radio signal intelligence The chapters are contributed by an international team of renown researchers and professionals in the field of AI and cybersecurity During the last few decades the rise of modern AI solutions that surpass humans in specific tasks has occurred Moreover these new technologies provide new methods of automating cybersecurity tasks In addition to the privacy ethics and cybersecurity concerns the readers learn several new cutting edge applications of AI technologies Researchers working in AI and cybersecurity as well as advanced level students studying computer science and electrical engineering with a focus on AI and Cybersecurity will find this book useful as a reference Professionals working within these related fields will also want to purchase this book as a reference

Cybersecurity and Artificial Intelligence Hamid Jahankhani, Gordon Bowen, Mhd Saeed Sharif, Osama Hussien, 2024-04-17 This book discusses a range of topics that are essential to understanding cyber security including legal implications and technical aspects cyber detection and minimising the threats so that governments and organisations can function without noticeable degradation of service Unlike other technological threats cyber security threats have the potential to destroy governments and undermine democratic processes which makes an overarching cyber security strategy essential for all functioning governments Thus the book serves as a guide for developing strategies and ideas in the field and as a motivator for other governments and interested parties to develop and implement effective strategies Arguably the most difficult aspect of these strategies is their implementation which will require a cultural sea change in governments approaches to handling cyber security and developing a regulatory framework that links organisations and governments in a secure working environment The development of cyber security strategies calls for new skills at the technical and user levels alike However IT skills are sometimes in short supply and without a government policy on cyber security training the lack of these skills could hamper the full potential of cyber security The book explores various aspects and challenges of cyber security strategy and highlights the benefits and drawbacks offering in depth insights into the field

Current and Future Trends on AI Applications Mohammed A. Al-Sharafi, Mostafa Al-Emran, Moamin A Mahmoud, Ibrahim Arpacı, 2025-01-21 This book offers a deep dive into cutting edge advancements and emerging trends that are reshaping industries and society From healthcare and cybersecurity to disaster management and energy informatics this book brings together expert insights and real world applications showcasing AI's profound impact and boundless potential Perfect for researchers practitioners and students alike this comprehensive guide not only highlights current innovations but also provides a forward looking perspective on how AI will drive the next wave of technological breakthroughs

Introduction to Artificial Intelligence Wolfgang Ertel, 2018-01-18 This accessible and engaging textbook presents a concise introduction to the exciting field of artificial intelligence AI The broad ranging discussion covers the key subdisciplines within the field describing practical algorithms and concrete applications in the areas of agents logic search reasoning under uncertainty machine learning neural networks and reinforcement learning Fully revised and updated

this much anticipated second edition also includes new material on deep learning Topics and features presents an application focused and hands on approach to learning with supplementary teaching resources provided at an associated website contains numerous study exercises and solutions highlighted examples definitions theorems and illustrative cartoons includes chapters on predicate logic PROLOG heuristic search probabilistic reasoning machine learning and data mining neural networks and reinforcement learning reports on developments in deep learning including applications of neural networks to generate creative content such as text music and art NEW examines performance evaluation of clustering algorithms and presents two practical examples explaining Bayes theorem and its relevance in everyday life NEW discusses search algorithms analyzing the cycle check explaining route planning for car navigation systems and introducing Monte Carlo Tree Search NEW includes a section in the introduction on AI and society discussing the implications of AI on topics such as employment and transportation NEW Ideal for foundation courses or modules on AI this easy to read textbook offers an excellent overview of the field for students of computer science and other technical disciplines requiring no more than a high school level of knowledge of mathematics to understand the material

Artificial Intelligence Using Federated Learning
Ahmed A Elngar, Diego Oliva, Valentina E. Balas, 2024-12-30 Federated machine learning is a novel approach to combining distributed machine learning cryptography security and incentive mechanism design It allows organizations to keep sensitive and private data on users or customers decentralized and secure helping them comply with stringent data protection regulations like GDPR and CCPA Artificial Intelligence Using Federated Learning Fundamentals Challenges and Applications enables training AI models on a large number of decentralized devices or servers making it a scalable and efficient solution It also allows organizations to create more versatile AI models by training them on data from diverse sources or domains This approach can unlock innovative use cases in fields like healthcare finance and IoT where data privacy is paramount The book is designed for researchers working in Intelligent Federated Learning and its related applications as well as technology development and is also of interest to academicians data scientists industrial professionals researchers and students

Artificial Intelligence Paradigms for Smart Cyber-Physical Systems Luhach, Ashish Kumar,Elçi, Atilla,2020-11-13 Cyber physical systems CPS have emerged as a unifying name for systems where cyber parts i e the computing and communication parts and physical parts are tightly integrated both in design and during operation Such systems use computations and communication deeply embedded in and interacting with human physical processes as well as augmenting existing and adding new capabilities As such CPS is an integration of computation networking and physical processes Embedded computers and networks monitor and control the physical processes with feedback loops where physical processes affect computations and vice versa The economic and societal potential of such systems is vastly greater than what has been realized and major investments are being made worldwide to develop the technology Artificial Intelligence Paradigms for Smart Cyber Physical Systems focuses on the recent advances in Artificial intelligence based approaches towards affecting secure cyber physical systems This book presents investigations on state of the art research issues applications and achievements in the field of computational intelligence paradigms for CPS Covering topics that include autonomous systems access control machine learning and intrusion detection and prevention systems this book is ideally designed for engineers industry professionals practitioners scientists managers students academicians and researchers

seeking current research on artificial intelligence and cyber physical systems *Advances in Artificial Intelligence, Software and Systems Engineering* Tareq Z. Ahram, 2018-06-28 This book focuses on emerging issues following the integration of artificial intelligence systems in our daily lives It focuses on the cognitive visual social and analytical aspects of computing and intelligent technologies highlighting ways to improve technology acceptance effectiveness and efficiency Topics such as responsibility integration and training are discussed throughout The book also reports on the latest advances in systems engineering with a focus on societal challenges and next generation systems and applications for meeting them It also discusses applications in smart grids and infrastructures systems engineering education as well as defense and aerospace The book is based on both the AHFE 2018 International Conference on Human Factors in Artificial Intelligence and Social Computing Software and Systems Engineering The Human Side of Service Engineering and Human Factors in Energy July 21 25 2018 Loews Sapphire Falls Resort at Universal Studios Orlando Florida USA **Artificial Intelligence and Actuarial Science** Sonal Trivedi, M. K. Nallakaruppan, Balamurugan Balusamy, Nithya Rekha Sivakumar, 2024-12-27 This book aims to explore how to automate innovate design and deploy emerging technologies in actuarial work transformations for the insurance and finance sector It examines the role of artificial intelligence with process automation in daily monitoring of solvency governance compliance data processes etc It also explores the usage of machine learning telematics system AI enabled claim processing software Big Data and Algorithms Explainable AI and AI enabled risk management tools in various actuarial processes This book Presents case studies and best practices with real world examples of successful and unsuccessful actuarial work transformation initiatives and transformation with emerging technologies Offers deployment solutions for different applications of AI in actuarial work Discusses how organizations can effectively incorporate AI into their current practices of actuarial work Covers diverse emerging technologies practices and processes of actuaries from around the globe Elaborates upon a framework for comprehending how big data and AI developments may affect insurance offers and their supervision Explains how insurance companies may review and modify their current Risk Management Framework RMF to take into account some of the significant differences while implementing AI use cases This reference book is for scholars researchers and professionals interested in Artificial Intelligence and Actuarial Science Smart Finance: Harnessing Artificial Intelligence to Transform Tax, Accounting, Payroll, and Credit Management for the Digital Age Jeevani Singireddy, 2025-04-26 In an era where digital transformation is reshaping every industry the world of finance stands at the forefront of change The integration of artificial intelligence AI into financial operations is not merely a trend it is a fundamental shift that is redefining how businesses and individuals manage money ensure compliance and make strategic decisions Smart Finance Harnessing AI to Transform Tax Accounting Payroll and Credit Management for the Digital Age explores this evolution offering a comprehensive look into how intelligent technologies are revolutionizing traditional financial practices This book was conceived with a singular vision to bridge the gap between advanced technology and

practical financial application We aim to provide professionals students and curious minds with insights into how AI is streamlining tax calculations automating accounting tasks optimizing payroll systems and enhancing credit risk assessment By drawing on real world case studies current innovations and forward thinking strategies we strive to demystify complex algorithms and highlight their practical implications Our intention is not only to inform but to inspire a mindset shift Finance is no longer confined to spreadsheets and manual audits it is becoming proactive predictive and profoundly data driven Through AI finance professionals can move beyond routine tasks and embrace roles as strategic advisors and innovation leaders We extend our gratitude to the technologists accountants tax experts payroll specialists and credit analysts who have contributed to this new frontier Their willingness to embrace change and experiment with AI driven solutions fuels the momentum toward smarter more agile financial systems As you delve into these pages we invite you to envision a future where finance is not just managed but intelligently optimized Welcome to the age of Smart Finance

Handbook of Research on AI Methods and Applications in Computer Engineering Kaddoura, Sanaa, 2023-01-30 The development of artificial intelligence AI involves the creation of computer systems that can do activities that would ordinarily require human intelligence such as visual perception speech recognition decision making and language translation Through increasingly complex programming approaches it has been transforming and advancing the discipline of computer science The Handbook of Research on AI Methods and Applications in Computer Engineering illuminates how today's computer engineers and scientists can use AI in real world applications It focuses on a few current and emergent AI applications allowing a more in depth discussion of each topic Covering topics such as biomedical research applications navigation systems and search engines this premier reference source is an excellent resource for computer scientists computer engineers IT managers students and educators of higher education librarians researchers and academicians

The Big Nine Amy Webb, 2019-03-05 A call to arms about the broken nature of artificial intelligence and the powerful corporations that are turning the human machine relationship on its head We like to think that we are in control of the future of artificial intelligence The reality though is that we the everyday people whose data powers AI aren't actually in control of anything When for example we speak with Alexa we contribute that data to a system we can't see and have no input into one largely free from regulation or oversight The big nine corporations Amazon Google Facebook Tencent Baidu Alibaba Microsoft IBM and Apple are the new gods of AI and are short changing our futures to reap immediate financial gain In this book Amy Webb reveals the pervasive invisible ways in which the foundations of AI the people working on the system their motivations the technology itself is broken Within our lifetimes AI will by design begin to behave unpredictably thinking and acting in ways which defy human logic The big nine corporations may be inadvertently building and enabling vast arrays of intelligent systems that don't share our motivations desires or hopes for the future of humanity Much more than a passionate human centered call to arms this book delivers a strategy for changing course and provides a path for liberating us from algorithmic

decision makers and powerful corporations

Introduction to Information Systems R. Kelly Rainer,Brad
