Metrics That Matter Zachary Bleemer, Mukul Kumar, Aashish Mehta, Chris Muellerleile, Christopher Newfield, 2023-03-21 This book examines alternative perspectives on often flawed and misleading college metrics to help students make important education decisions

Investing in College Malcolm GETZ, 2009-06-30 College education is one of the most important investments a family will make But between the viewbooks websites insider gossip and magazine rankings students and their worried parents face a dizzying array of options What do the rankings really mean Is it wise to choose the most prestigious school a student can get into What are the payoffs of higher education and by the way how do we pay for them In a unique approach to these conundrums an economist and award winning teacher walks readers through the opportunities risks and rewards of heading off to college Warning against the pitfalls of numerical rankings Malcolm Getz poses questions to guide a student toward not necessarily the best college but the right one Famous professors suggest quality but do they teach undergraduates Are smaller classes always better When is a state university the best deal around In a concise overview of decades of research Getz reviews findings on the long term returns of college education in different careers from law to engineering from nursing to financial management Sorting through personal professional and institutional variables he helps families determine when paying 40 000 a year might make sense and when it merely buys an expensive rear window decal He breaks down the formidable admissions game into strategies to improve the odds of acceptance and he offers tips on tax breaks subsidized loans federal grants 529 accounts merit scholarships and much more Shrewd and sensible *Investing in College* is an invaluable resource and a beacon of sanity for college bound students and the families who support them
