term thinking has blinded some of the nation's finest minds to the long run implications of their actions. Law school deans have ceded independent judgment to flawed U.S. News World Report rankings criteria in the quest to maximize immediate results. Senior partners in the nation's large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions. Yet wiser decisions being honest about the legal job market, revisiting the financial incentives currently driving bad behavior, eliminating the billable hour model and more can take the profession to a better place. A devastating indictment of the greed, shortsightedness and dishonesty that now permeate the legal profession, this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again.

The College Completion Glass—Half-Full or Half-Empty? Tiffany Beth Mfume, 2018-12-21. Despite the Great Recession and looming student loan debt crisis, college education remains the most proven, invaluable lifetime investment and serves as the most reliable path to upward mobility and socioeconomic class reassignment. Mfume suggests that the value added of even one year of college can be transformative. As higher education professionals and partners continue to advocate for new and improved college retention and graduation measures, *The College Completion Glass: Half Full or Half Empty: Exploring the Value of Postsecondary Education* presents a new paradigm for higher education, one that focuses on the value added of postsecondary education as well as on student success beyond the traditional measure of college graduation rates, a model which merges conventional practices and supports for students with non-traditional partnerships with and advocacy from successful non-completers.

The Impact of Higher Education Ranking Systems on Universities Kevin Downing, Petrus Johannes Looock, Sarah Gravett, 2021-04-04. This book, written by three generations of rankings academics with considerable experience from three very different regions of the globe, lifts the lid on the real impact of higher education ranking systems (HERS) on universities and their stakeholders. It critically analyses the criteria that make up the Big Three global ranking systems and, using interviews with senior administrators, academics and managers, discusses their impact on universities from four very different continents. Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS. Despite all the opinions and arguments about the legitimacy of the rankings as a construct, it seems experts agree that they are here to stay. The question therefore seems to be less about whether or not universities should be compared and ranked, but the manner in which this is undertaken. Delivering a fresh perspective on global rankings, this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions: South Africa, the Arab region, South East Asia and Australia. It will appeal to any academic, student, university administrator or governing body interested in or affected by global higher education ranking systems.
