This edited collection brings together theoretical and empirical reflections on the role played by new technology and digital

platforms in the provision of food The way food is produced distributed consumed and disposed has significant consequences for the environment affecting soil fertility water and air quality the state of the climate and the loss of biodiversity Such negative effects are strictly related to the agro industrial system of production and consumption based on logic of low prices high availability and high waste This collection brings together a carefully curated range of insights from a team of twenty researchers coming from different fields working in different European universities engaged in the same project for more than three years As a result this book will appeal to people working on food studies and on sustainable food production and consumption offering both conceptual theoretical insights into contemporary food issues alongside empirical illustrations
