Netflix Top Store Hours:

Competing in Tough Times Barry R. Berman, 2010-11-05 *Competing in Tough Times* brings together the powerful new strategies that world class retailers like Trader Joe's, Costco and Nordstrom are using today to survive and thrive in a brutally unforgiving retail environment. Internationally respected retail management expert Barry Berman shows retailers and their suppliers exactly how to build effective strategies based on cost and differentiation plan and implement those strategies and measure the results. Berman offers detailed coverage of implementing strategies based on becoming the low cost provider and minimizing product proliferation enhancing the service experience developing and maintaining a strong private label program and more. To support each approach he presents full length examples from retailers covering every market sector from consumer goods to apparel to technology. He thoroughly examines top retailers such as Aldi, Amazon.com, L.L. Bean, Publix, Stew Leonard's, Wegman's and Whole Foods and shares powerful insights drawn from the experiences of other leaders from Au Bon Pain to Best Buy, Family Dollar to Target, Tesco to Walgreen. **Business Model Innovation** Allan

Afuah, 2014-03-26 Rooted in strategic management research *Business Model Innovation* explores the concepts, tools and techniques that enable organizations to gain and/or maintain a competitive advantage in the face of technological innovation, globalization and an increasingly knowledge intensive economy. The book investigates how organizations can use innovations in business models to take advantage of entrepreneurial opportunities from Crowdsourcing and open innovation, Long Tails, Social media, Disruptive technologies, Less is more, innovations, Network effects, Scarcity of complementary capabilities. The book also looks at the ways firms can use innovations in business models to exploit or defend against threats. With twelve supplementary cases to help readers apply the concepts and techniques, this book is a must have for anyone looking to understand the fundamentals of business model innovation. Netflix's Speculative Fictions Colin Jon Mark

Crawford, 2020-12-10 *Netflix's Speculative Fictions: Financializing Platform Television* argues that Netflix's scaled expansion has hinged upon its ability not only to create but more importantly to communicate new forms and flows of potential value in platform capitalism wherein capital is mobilized not only from direct revenue streams but also the new value assigned to inputs and investments of data, debt, attention, behavior, taste, time, sociality and speculation. To interpret and critique these new communications and projections of value, Colin Jon Mark Crawford performs a discursive analysis of the platform television industry leader Netflix and its investor lore, the multi-sited narrative of value found in the company's investor relations materials and corporate communications such as letters to shareholders, financial earnings reports, executive interviews, press releases and blog posts. Netflix best represents the increasingly ubiquitous nexus of culture, tech and finance industries that is platform television. To better understand the emergent financial logics of this relatively new media industry, we must first understand the speculative narratives and discourses of value which organize it. Scholars of media studies, television studies, technology studies and economics will find this book particularly useful. Strategic Digital

Chokepoint Capitalism Rebecca Giblin, Cory Doctorow, 2022-09-27 A call to action for the creative class and labor movement to rally against the power of Big Tech and Big Media. Corporate concentration has breached the stratosphere as have corporate profits. An ever-expanding constellation of industries are now monopolies where sellers have excessive power over buyers or monopsonies where buyers hold the whip hand over sellers or both. In Chokepoint Capitalism, scholar Rebecca Giblin and writer and activist Cory Doctorow argue we're in a new era of chokepoint capitalism with exploitative businesses creating insurmountable barriers to competition that enable them to capture value that should rightfully go to others. All workers are weakened by this, but the problem is especially well illustrated by the plight of creative workers. From Amazon's use of digital rights management and bundling to radically change the economics of book publishing to Google and Facebook's siphoning away of ad revenues from news media and the Big Three record labels' use of inordinately long contracts to up their own margins at the cost of artists, chokepoints are everywhere. By analyzing book publishing and news, live music and music streaming, screenwriting, radio, and more, Giblin and Doctorow deftly show how powerful corporations construct anti-competitive flywheels designed to lock in users and suppliers, make their markets hostile to new entrants, and then force workers and suppliers to accept unfairly low prices. In the book's second half, Giblin and Doctorow then explain how to batter through those chokepoints with tools ranging from transparency rights to collective action and ownership, radical interoperability, contract terminations, job guarantees, and minimum wages for creative work. Chokepoint Capitalism is a call to workers of all sectors to unite to help smash these chokepoints and take back the power and profit that's being heisted away before it's too late.
