Do Rating Announcements convey new Information? Jan Klobucnik, 2010-07-15 Inhaltsangabe Introduction Since the beginning of the last century investors in capital markets have strongly relied on rating agencies assessments of credit quality to decide on investments Due to their important role in debt markets they are supposed to provide accurate ratings without delay However cases like the defaults of WorldCom or Enron have damaged their reputation In particular credit rating agencies have been heavily criticized for their role during the financial crisis of 2007 2009 Many economists blame the rating agencies for having played a major part in the securitization process of mortgage loans by providing too high rating grades and thus sowing the seeds of the crisis Having rated credit derivatives like collateralized debt obligations with best grades the rating agencies encouraged banks and other financial institutions to keep these assets in their portfolios As a result it caused severe problems for the banking sector when these products heavily lost in value Along with imprecise assessments of creditworthiness the slow reaction of rating agencies has been criticized over the last few years Therefore the question of how well the agencies assess credit quality arises This question is of great importance because of their dominant role on capital markets and the fact that decisions are made upon their ratings To put it more precisely this study asks whether the agencies process and convey new information to the market On the other hand it might be the case that market participants anticipate any change in the credit quality of a company before these institutions publish their assessments Answering this question is of particular importance if the rating announcements convey unknown information and the market reacts then rating agencies are a systemic part of capital markets and policy should consider stricter regulation to prevent manipulation and failures like those described above Conversely if their announcements do not contain any new information or to put it differently if markets react faster then we could think about using market based indicators instead in order to assess credit risk In this case the economic task of signaling creditworthiness could be handed over among others to Credit Default Swaps see Chapter 2 which is also suggested by Hart Zingales This thesis contributes to the field of rating agencies performance measurement Evaluating their announcements with the FDIC Banking Review, 2005 **Princeton Review** **GMAT Premium Prep, 2023** The Princeton Review, 2022-07-12 Make sure you're studying with the most up to date prep materials Look for the newest edition of this title The Princeton Review GMAT Premium Prep 2024 ISBN 9780593516911 on sale May 2023 Publisher's Note Products purchased from third party sellers are not guaranteed by the publisher for quality or authenticity and may not include access to online tests or materials included with the original product **Reviews of Environmental Contamination and Toxicology 192** George Ware, 2008-02-01 International concern in scientific industrial and governmental communities over traces of xenobiotics in foods and in both abiotic and biotic environments has justified the present triumvirate of specialized publications in this field comprehensive reviews rapidly published research papers and progress reports and archival documentations These three international publications are integrated and scheduled to provide

the coherency essential for nonduplicative and current progress in a field as dynamic and complex as environmental contamination and toxicology This series is reserved exclusively for the diversified literature on toxic chemicals in our food our feeds our homes recreational and working surroundings our domestic animals our wildlife and ourselves Tremendous efforts worldwide have been mobilized to evaluate the nature presence magnitude fate and toxicology of the chemicals loosed upon the earth Among the sequelae of this broad new emphasis is an undeniable need for an articulated set of authoritative publications where one can find the latest important world literature produced by these emerging areas of science together with documentation of pertinent ancillary legislation Research directors and legislative or administrative advisers do not have the time to scan the escalating number of technical publications that may contain articles important to current responsibility Rather these individuals need the background provided by detailed reviews and the assurance that the latest information is made available to them all with minimal literature searching Justice of the Peace and Local Government Review ,1839
