our lives how we work what we eat our health how we communicate what we know and believe whom we elect and how we relate to one another and to nature Their power over markets trade regulation and most every aspect of our governance is more intrusive and farther reaching than ever They benefit from tax breaks government guarantees and bailouts that we must pay for and have no control over Their accumulation of capital creates immense wealth for a minuscule elite deepening disparities while politics and governance become ever more subservient to their power They determine our skills and transform employment through the tools and services they create as no other organizations can They produce a vast array of goods and services with labor marketing and research that are more intrusively controlled than ever as workplace rights and job security are curtailed or disappear Our consumption of their products and their capacity to promote wants is deep and far reaching while the waste they generate raises concerns about the survival of life on our planet And their links to geopolitics and the martial domain are stronger than ever as they influence how warfare is waged and who will be vanquished
