Clash Nirmalya Kumar, 2024-03-15 Amazon and Walmart with more than half a trillion in revenues annually are the two largest companies in the world. They have not only redefined the retail industry. Walmart in the 1980s 1990s and Amazon since 2000 but have also been the benchmark for business best practices e.g. the use of IT supply chain data analytics customer orientation. This year it is anticipated that Amazon will dethrone Walmart as the world's largest company a position that Walmart has occupied for more than two decades. By examining these two companies and their business models in depth Professor Nirmalya Kumar elucidates on the more general phenomenon of incumbents competing with disruptors e.g. Volkswagen vs Tesla Marriott vs Airbnb as well as the move to omnichannel retail where physical stores must coexist with online retailers.

Making Sense of Data in the Media Andrew Bell, Todd Hartman, Aneta Piekut, Alasdair Rae, Mark Taylor, 2019-11-04 The amount of data produced captured and transmitted through the media has never been greater. But for this data to be useful it needs to be properly understood and claims made about or with data need to be properly scrutinized. Through a series of examples of statistics in the media this book shows you how to critically assess the presentation of data in the media to identify what is significant and to sort verifiable conclusions from misleading claims. How accurate are polls and how should we know? How should league tables be read? Are numbers presented as large really as big as they may seem at first glance? By answering these questions and more readers will learn a number of statistical concepts central to many undergraduate social science statistics courses. By tying them in to real life examples the importance and relevance of these concepts comes to life. As such this book does more than teaches techniques needed for a statistics course it teaches you life skills that we need to use every single day.
