Feng Yu Computing Reviews June 28 2016 This is a book for enterprise architects database administrators and developers
who need to understand the latest developments in database technologies It is the book to help you choose the correct
database technology at a time when concepts such as Big Data NoSQL and NewSQL are making what used to be an easy
choice into a complex decision with significant implications The relational database RDBMS model completely dominated
database technology for over 20 years Today this one size fits all stability has been disrupted by a relatively recent explosion
of new database technologies These paradigm busting technologies are powering the Big Data and NoSQL revolutions as well
as forcing fundamental changes in databases across the board Deciding to use a relational database was once truly a no
brainer and the various commercial relational databases competed on price performance reliability and ease of use rather
than on fundamental architectures Today we are faced with choices between radically different database technologies
Choosing the right database today is a complex undertaking with serious economic and technological consequences Next
Generation Databases demystifies today s new database technologies The book describes what each technology was designed
to solve It shows how each technology can be used to solve real word application and business problems Most importantly
this book highlights the architectural differences between technologies that are the critical factors to consider when
