The Zinc and Iodine Book Stephen DeMeo, 2019-05-15. This book is for chemistry teachers who are thinking about reinventing their laboratory experiments that they provide to their students. More than a collection of experiments, it is an example of using a chemical theme to teach chemistry. Instead of introducing many different chemicals per experiment, as is the norm in most lab manuals, this novel resource focuses on two commonly found elements: Zinc and Iodine. So what is so special about these elements? At the heart of this resource is a colorful cyclic reaction between zinc and iodine, one that produces a compound that can decompose back to its original elements. This unique phenomenon demonstrates that matter not only changes but is also conserved through a chemical reaction. Knowing that a compound can be the same but different than the reactants that formed it is to understand the essence of chemical change. Complementing this reaction, this book contains experimental activities that utilize the zinc and iodine theme to scaffold new concepts such as the properties of matter, solid and gas stoichiometry, equilibrium, kinetics, acid-base chemistry, and electrochemistry. This teacher-tested resource focuses on a set of safe substances that are appropriate for high school teachers who provide an advanced chemistry placement course and for

college instructors teaching a first year chemistry laboratory sequence *Driving Scientific and Engineering Discoveries Through the Integration of Experiment, Big Data, and Modeling and Simulation* Jeffrey Nichols, Arthur 'Barney' Maccabe, James Nutaro, Swaroop Pophale, Pravallika Devineni, Theresa Ahearn, Becky Verastegui, 2022-03-09 This book constitutes the revised selected papers of the 21st Smoky Mountains Computational Sciences and Engineering Conference SMC 2021 held in Oak Ridge TN USA in October 2021 The 33 full papers and 3 short papers presented were carefully reviewed and selected from a total of 88 submissions The papers are organized in topical sections of computational applications converged HPC and artificial intelligence advanced computing applications use cases that combine multiple aspects of data and modeling advanced computing systems and software connecting instruments from edge to supercomputers deploying advanced computing platforms on the road to a converged ecosystem scientific data challenges The conference was held virtually due to the COVID 19 pandemic *Scientific and Technical Aerospace Reports* ,1995
