Best Practices for Commercial Roof-Mounted Photovoltaic System Installation Rosalie Wills, James A. Milke, Sara Royle, Kristin Steranka, 2015-05-22 This SpringerBrief presents information on a wide variety of hazards and the damage potential caused by installation of a photovoltaic PV system. The current installation practices for PV systems on roofs create electrical, fire, structural, and weather-related hazards that do not comply with current codes, standards, and guidance documents. Potential dangers include structural loading, wind loads, hail, snow, debris accumulation, seismic hazards, firefighting hazards, and electrical hazards. Despite the increased popularity of PV systems, after the environmental movement, research shows that the costs of installing PV systems outweigh the benefits. Hazards of PV systems on roofs have caused several incidents in the United States, the most notable in Bakersfield, California, and Mount Holly, North Carolina. Designed for fire engineers and professionals, *Best Practices for Commercial Roof Mounted Photovoltaic System Installation* offers recommendations to set up PV systems safely and sustainably.
