The Casa del Deán Penny C. Morrill,2023-09-15 The Casa del De n in Puebla Mexico is one of few surviving sixteenth century residences in the Americas Built in 1580 by Tom s de la Plaza the Dean of the Cathedral the house was decorated with at least three magnificent murals two of which survive Their rediscovery in the 1950s and restoration in 2010 revealed works of art that rival European masterpieces of the early Renaissance while incorporating indigenous elements that identify them with Amerindian visual traditions Extensively illustrated with new color photographs of the murals The Casa del De n presents a thorough iconographic analysis of the paintings and an enlightening discussion of the relationship between Tom s de la Plaza and the indigenous artists whom he commissioned Penny Morrill skillfully traces how native painters trained by the Franciscans used images from Classical mythology found in Flemish and Italian prints and illustrated books from France as well as animal images and glyphic traditions with pre Columbian origins to create murals that are reflective of Don Tom s s erudition and his role in evangelizing among the Amerindians She demonstrates how the importance given to rhetoric by both the Spaniards and the Nahuas became a bridge of communication between these two distinct and highly evolved cultures This pioneering study of the Casa del De n mural cycle adds an important new chapter to the study of colonial Latin American art as it increases our understanding of the process by which imagery in the New World took on Christian meaning

Environmental Geochemistry in Tropical and Subtropical Environments Luiz Drude de Lacerda,Ricardo Erthal Santelli,Egbert K. Duursma,Jorge Joao Abrao,2013-06-29 Three symposia on environmental geochemistry in tropical countries held in Niterói Brazil 1993 in Cartagena Colombia 1996 and in Nova Friburgo Brazil 1999 made it very clear that

tropical geochemistry is of world standard and fast increasing in multi disciplinarily and impact on important geochemical paradigms It has additionally strong links with the economy of tropical countries such as mining and industrialisa tion and is in full development for treating environmental problems caused by human activities of urban or industrial origin We must compliment Prof Jorge Abriio and his colleagues in Brazil and Dr Gloria Prieto and her colleagues in Colombia for these ini tiatives The participation of respectively 180 and 150 scientists coming from 15 different countries for the first and second symposia has shown that a large interest exists for tropical environmental geochemistry It also demonstrates the necessity to understand tropical environmental problems The organisation of a large international symposium is not possible without the assistance of state and federal authorities for which those of Brazil and Colombia have to be complimented The 3rd Symposium on Environmental Geochemistry in Tropical Countries was the last of the series and was attended by 22 countries and 170 participants and treated a number of related environmental and economic problems *The Christian Union* Henry Ward Beecher,1887 The Christian Union ,1887 **Outlook** Alfred Emanuel Smith,Francis Walton,1887 The Examiner ,1845 **Athenaeum and Literary Chronicle** ,1861
