have been developed to address this question The main theme of this book Knowledge Representation and Inductive Reasoning using Conditional Logic and Sets of Ranking Functions is inductive reasoning from conditional knowledge bases Using ordinal conditional functions as ranking models for conditional knowledge bases the author studies inferences induced by individual ranking models as well as by sets of ranking models He elaborates in detail the interrelationships among the resulting inference relations and shows their formal properties with respect to established inference axioms Based on the introduction of a novel classification scheme for conditionals he also addresses the question of how to realize and implement the entailment relations obtained In this work Steven Kutsch convincingly presents his ideas provides illustrating examples for them rigorously defines the introduced concepts formally proves all technical results and fully implements every newly introduced inference method in an advanced Java library He significantly advances the state of the art in this field Prof Dr Christoph Beierle of the FernUniversität in Hagen

Failing Beautifully in Science Olaf Kühne,2025-11-01 When science directs its theoretical and empirical tools toward itself metatheoretical reflections or sociological studies of science emerge It examines the function of science for society and explores its relationship to politics This book does all of this to some extent In a different way Ironically and satirically It is largely based on the phenomenological everyday experience of this system and its peculiarities This experience captured in caricatures is in turn linked back to theoretical considerations particularly neopragmatism with its constitutive ideas of contingency the importance of language and irony as a tool for coping with the world And of course its contribution to problem solving The book is aimed at people involved with university life directly or indirectly But it is particularly aimed at people who are just approaching university life who react with alienation to customs and incomprehension to certain rituals It s also aimed at people who are irritated by the demands made by and of universities on the one hand and by what they find there on the other And those who want to smile about that and perhaps even at themselves as part of this network
