The Art Of Sales: The Sales Engineer And The Business Developer Mohamed Tahar Hamimi, 2025-04-07 This book serves two key purposes: to expand practical business knowledge and to equip professionals with actionable insights into this specialized field, enabling them to make informed career decisions. Drawing from my personal experience, I've included real-world examples and case studies carefully anonymized to maintain confidentiality that illustrate both challenges and solutions in this profession. Additionally,

recognizing the multilingual nature of industrial work The sales process is based on achieving the highest percentage of profit in the shortest possible time by achieving the highest percentage of sales of solutions materials or services The higher the sales rate the more direct the impact on production efficiency and of course on profits continuity and effectiveness of the organization To achieve this the optimal management of human resources and the adaptation of jobs according to market requirements is more than necessary even mandatory Based on this it is not possible to employ a sales representative to convince customers and thus sell solutions services or materials without knowledge and control of the type of service or material offered for sale Therefore one of the necessary conditions for successful sales and promotion is the level of the representative who promotes the offer or even the idea Hence some sectors such as the industrial sector need engineers to work as sales representatives to ensure efficiency and achieve the goals and objectives of companies It is worth noting that it is not mandatory for the sales engineer to be trained or certified as an engineer but it is necessary at least for his university path to be commercial ensuring training internships and experience in the market
