Red Stream Paul Tracy, 2013-03-28 Max paused and bent his head at an angle to get a better look That was wine a leak coming from one of the vats not much a dribble but definitely a leak wending its way across the slightly sloping floor of the cellar into the gutter running down the middle He walked briskly towards it then stopped catching his breath The shiny black shoes stuck out foolishly into the alley just below the blue overalls Pierre Berton a youngish man with sandy hair lay on his side with a sad expression on his face The red stream gently seeping across the cellar floor was not wine This macabre discovery in a wine cellar in south west France is the beginning for Max Christian winemaker extraordinary of a chase to uncover a huge network of wine fraud with worldwide tentacles The pursuit takes him to Provence London Italy and California with the increasing feeling that he is gradually turning from the hunter into the hunted But in that case who are the hunters Written by an insider Red Stream is an amazing thriller that perfectly takes advantage of its unusual background Highly recommended for everyone a must have for all wine lovers

Quotations Robert Merton,2018-04-27 Social Science Quotations has been prepared to meet an evident unmet need in the literature of the social sciences Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought those works with staying power often described as the classical texts Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well This book is useful to social scientists anthropologists economists historians political scientists psychiatrists psychologists sociologists and statisticians and for all who want to learn or verify memorable formulations and phrases concerning social thought and social theories It is particularly useful for graduate students taking courses that examine the history of their discipline
