Order And Justice In International Relations:

Order and Justice in International Relations Rosemary Foot, John Gaddis, Andrew Hurrell, 2003-02-13 The relationship between international order and justice has long been central to the study and practice of international relations. For most of the twentieth century states and international society gave priority to a view of order that focused on the minimum conditions for coexistence in a pluralist conflictual world. Justice was seen either as secondary or sometimes even as a challenge to order. Recent developments have forced a reassessment of this position. Firstly many trends in the 1990s increased expectations of greater justice within a liberal and liberalizing international order for example in relation to human rights humanitarian intervention collective security and self determination. Second globalization deepened the sense of ideational and material interdependence prompting acknowledgement that we co exist in a single world and that effective solutions to shared problems cannot be achieved without a concern for justice especially as the negative aspects of globalization have become more evident. Third claims to justice and critiques of the existing order have been forcefully pressed by an increasing range of non governmental and other groups within transnational civil society. These three developments suggest movement towards a greater solidarist consciousness and ambition based primarily on a liberal vision of the relationship between order and justice. This book sets current concerns within a broad historical and theoretical context explores the depth and scope of this presumed solidarism amidst the difficulties of acting on the basis of a more strongly articulated liberal position and underscores the complexity and abiding tensions inherent in the relationship between order and justice. Chapters examine a wide range of state and transnational perspectives on order and justice including those from China India Russia the United States and the Islamic world. Other chapters investigate how the order justice relationship is mediated within major international institutions including the United Nations the World Trade Organization and the global financial institutions.

brings postcolonial critique directly to bear on established ways of theorizing international relations Its primary concern is with the non European world and its relations with the North In advancing an alternative conception of relations international the book draws on alternative source material and different forms of writing It also features short stories an interview and explores the role of poetics and performance The suzerainty of the disciplinary writ is challenged on three primary grounds Firstly on its Eurocentrism which leads the discipline to pass lightly over the distinctive life experiences of most of the world s people Secondly on the discipline s failure to engage in any systematic way with other bodies of

knowledge about the international as for example international political economy postcolonialism and development Lastly it confronts the top down nature of the politics of the discipline and that seldom addresses everyday life From squatter towns to the evasions of the poor from law through to literature this work raises a number of problems for International relations It challenges a colonial mindset de centres the west and opens the field to new approaches that are far more inter disciplinary than international relations generally allows It is a provocative contribution for students and scholars of IR and Postcolonial studies alike

Political Economy of Statebuilding Mats Berdal, 2017-07-05

This volume examines and evaluates the impact of international statebuilding interventions on the political economy of post conflict countries over the past 20 years While statebuilding today is typically discussed in the context of peacebuilding and stabilisation operations the current phase of interest in external interventions to re build and strengthen governmental institutions can be traced back to the good governance policies of the International Financial Institutions IFIs in the early 1990s These sought political changes and improvements in the quality of governance in countries that were subject to or were seeking support under IFI designed structural adjustment programmes The focus of this book is specifically on state building efforts in conflict affected countries countries that are emerging or have recently emerged from periods of war and

violent conflict The interventions covered in the present volume fall into three broad and overlapping categories International administrations and transformative occupations East Timor Iraq and Kosovo Complex peace operations Afghanistan Burundi Haiti and Sudan Governance and state building programmes conducted in the context of economic assistance Georgia and Macedonia This book will be of much interest to students of statebuilding humanitarian intervention post conflict reconstruction political economy international organisations and IR Security Studies in general **A New Deal for the World** Elizabeth Borgwardt,2007-09-30 In a work of sweeping scope and luminous detail Elizabeth Borgwardt describes how a cadre of World War II American planners inaugurated the ideas and institutions that underlie our modern international human rights regime Borgwardt finds the key in the 1941 Atlantic Charter and its Anglo American vision of war and peace aims **Spheres of Influence in International Relations** Susanna Hast,2016-04-01 Current events happening around the world especially the humanitarian interventions by NATO and the West within the context of the so called Arab Spring make the understanding of the role of spheres of influence in international politics absolutely critical Hast explores the practical implications and applications of this theory challenging the concept by using historical examples such as suzerainty and colonialism as well as the emergence of a hierarchical international order This study further connects the English School tradition post war international order the Cold War and images of Russia with the concept of the sphere of influence to initiate debate and provide a fresh outlook on a concept which has little recent attention **Global Political Economy** John Ravenhill,2008 An authoritative introduction to Global Political Economy The book covers all bases contemporary theory introductions to particular issue areas and an extended debate on globalization that reflects a variety of perspectives The book is accompanied by an Online Resource Centre Student resources Timeline Web links Glossary Instructor resources Tables and figures from the book to download 2 in depth case studies [India's Grand Strategy](#) Kanti Bajpai,Saira Basit,V. Krishnappa,2014-08-07 As India prepares to take its place in shaping the course of an Asian century there are increasing debates about its grand strategy and its role in a future world order This timely and topical book presents a range of historical and contemporary interpretations and case studies on the theme Drawing upon rich and diverse narratives that have informed India s strategic discourse security and foreign policy it charts a new agenda for strategic thinking on postcolonial India from a non Western perspective Comprehensive and insightful the work will prove indispensable to those in defence and strategic studies foreign policy political science and modern Indian history It will also interest policy makers think tanks and diplomats **The Closure of the International System** Lora Anne Viola,2020-07-09 As global governance appears to become more inclusive and democratic many scholars argue that international institutions act as motors of expansion and democratization The Closure of the International System challenges this view arguing that the history of the international system is a series of institutional closures in which institutions such as diplomacy international law and international organizations make rules to legitimate the inclusion of some actors and the

exclusion of others While international institutions facilitate collective action and common goods Viola s closure thesis demonstrates how these gains are achieved by limiting access to rights and resources creating a stratified system of political equals and unequals The coexistence of equality and hierarchy is a constitutive feature of the international system and its institutions This tension is relevant today as multilateral institutions are challenged by disaffected citizens non Western powers and established great powers discontent with the distribution of political rights and authority
