

Compare and Order Decimals Lesson Plan

Name: Samantha Basile

Date: 02/14/2014

Type of Setting: This lesson will be taught in a self-contained 4th/5th grade classroom. The 4th and 5th graders separate during the math lessons, so only seven students will be present for the lesson.

1. PURPOSE

This lesson will help the students gain a better understanding of place value by comparing and ordering decimals to thousandths.

Essential Questions-

~How can you use place value to compare and order decimals?

2. VOCABULARY & KEY TERMS

Decimal: The point or dot used to separate the whole number part from the fractional part of a number.

Place Value: the value of where the digit is in the number, such as unit, tens, etc.

Example: In the number 3.544, the place value of 5 is tenths.

3. OBJECTIVE(S)

Students will be able to identify place values.

Students will be able to order decimal numbers by comparing the place values up to the thousandths place.

4. NEW YORK STATE LEARNING STANDARDS:

MATHEMATICS-

Understand the place value system C.5. NBT. 3

a. Read and write decimals to thousandths using base-ten numerals, number names, and expanded form, e.g., $347.392 = 3 \times 100 + 4 \times 10 + 7 \times 1 + 3 \times (1/10) + 9 \times (1/100) + 2 \times (1/1000)$.

b. Compare two decimals to thousandths based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.

5. PRE-ASSESSMENT:

This lesson is being used to help the students develop a better understanding of the significance of place values. They will build on previous concepts and use different strategies along the way.

6. LESSON PRESENTATION:

SET INDUCTION-

Write the essential question on the board, "How can you use place value to compare and order decimals?" Call on a student to read the question and discuss that by the completion of this lesson we will be able to it. Then, ask the student "When do we compare or order

Ordering Decimals Lesson Plan:

Math Made a Bit Easier Lesson Plans Larry Zafran, 2010-01-19 This is the third book in the Math Made a Bit Easier series by independent math tutor Larry Zafran. It is a book of sixty lesson plans for tutors, parents, and homeschoolers. Each lesson plan includes all the components of a typical classroom lesson such as aim, motivation, warm-up exercises, demonstrative examples, questions for thought and discussion, and connections to earlier and later material. The math content in this book is directly aligned and ideally used in conjunction with the first book of the series and its companion workbook of practice exercises. It covers the topics which comprise the foundation of math, beginning with lessons in basic arithmetic followed by basic operations, negative numbers, fractions, decimals, percents, and basic probability and statistics. If these topics are not completely mastered, later work will prove to be quite difficult. This is especially true of algebra. The book includes a chapter on how to be an effective math tutor as well as a chapter on how to optionally incorporate meditation instruction to help students get into a relaxed and alert state of mind, which is ideal for learning math and taking exams. *Maths Action Plans* David Clemson, Nelson, 2003-06 Maths Action Plans is a series of four books for Years 4, 6, P5, 7 offering flexible supportive teacher and pupil resources and coherent coverage of the five strands of the Framework for Teaching Mathematics. The series provides inspiring flexible activities that can be fitted into any maths scheme. Each title contains clear learning objectives linked to the Framework for Teaching Maths, the National Curriculum Programme of Study, and the 5-14 National Guidelines for Mathematics, lesson plans with up to three levels of differentiation, supplementary activities for consolidation or linked work, and suggestions for the application of ICT skills. **Theory and Practice of Lesson Study in Mathematics** Rongjin Huang, Akihiko Takahashi, João Pedro da Ponte, 2019-05-28 This book brings together and builds on the current research efforts on adaptation, conceptualization, and theorization of Lesson Study (LS). It synthesizes and illustrates major perspectives for theorizing LS and enriches the conceptualization of LS by interpreting the activity as it is used in Japan and China from historical and cultural perspectives. Presenting the practices and theories of LS with practicing teachers and prospective teachers in more than 10 countries, it enables the reader to take a comparative perspective. Finally, the book presents and discusses studies on key aspects of LS such as lesson planning, post-lesson discussion, guiding theories, connection between research and practice, and upscaling Lesson Study, which has originated in Asia as a powerful, effective professional development model. Although the positive effects of lesson study on teacher learning, student learning, and curriculum reforms have been widely documented, conceptualization of and research on LS have just begun to emerge. This book, including 38 chapters contributed by 90 scholars from 21 countries, presents a truly international collaboration on research on and adaptation of LS and significantly advances the development of knowledge about this process. Chapter 15: How Variance and Invariance Can Inform Teachers' Enactment of Mathematics Lessons of this book is available open access under a CC BY 4.0 license at link.springer.com. *Theory and Practice of Lesson Study in Mathematics* An

Hart, Alice S. Alston, Aki Murata, 2011-01-11 Lesson study is a professional development

process that teachers engage in to systematically examine their practice with the goal of becoming more effective. Originating in Japan, lesson study has gained significant momentum in the mathematics education community in recent years. As a process for professional development, lesson study became highly visible when it was proposed as a means of supporting the common practice of promoting better teaching by disseminating documents like standards, benchmarks, and nationally validated curricula. While the body of knowledge about lesson study is growing, it remains somewhat elusive and composed of discrete research endeavors. As a new research area, there is no coherent knowledge base yet. This book will contribute to the field, bringing the work of researchers and practitioners together to create a resource for extant work. This book describes several aspects of Lesson Study; amongst others, it gives an historical overview of the concept, it addresses issues related to learning and teaching mathematics, it looks at the role of the teacher in the process. The last two sections of the book look at how Lesson Study can be used with preservice mathematics teachers and at university mathematics methods teaching.

Planning the Primary National Curriculum Keira Sewell, 2015-04-02 To prepare to teach the new Primary National Curriculum, you need more than just the Programmes of Study. You need a resource to help you understand, plan for, teach, and assess the curriculum. This is it. Your guide to planning the 2014 primary national curriculum. This book explores how to plan in primary schools. It covers curriculum design and structure, challenges to learning, and how children learn. For each curriculum subject, the programme of study is included with notes to help you interpret it for your own class. The text covers how the teaching of each subject can be organised, assessment opportunities, key and essential resources in each subject, and how ICT can best be used in each subject to enhance teaching. Sequenced lesson examples in all subject chapters link theory to practice and highlight progression. The final section of the book explores the many ways in which the curriculum can be delivered. The creative curriculum, dialogic teaching, cross-curricular learning, and more current thinking about interpreting the curriculum.

Teaching Powerful Problem-Solving in Math Catherine C. Lewis, Akihiko Takahashi, Shelley Friedkin, Nora Houseman, Sara Liebert, 2025-08-22 *Teaching Powerful Problem Solving in Math* provides the first in-depth portrait of schoolwide lesson study, showing how U.S. teachers at several schools used it to implement powerful problem-based mathematics instruction. Students learn mathematics by confronting a novel problem and building the new understanding of the mathematical concepts needed to solve it, just as mathematicians would. By learning in this way, students discover the power of their own thinking and gain confidence that extends well beyond mathematics. This book introduces readers to urban elementary and K-8 schools where teachers have dramatically transformed math learning for teachers and for students. Readers will follow teachers as they transform instruction using schoolwide lesson study, building powerful new ways for educators to learn from each other and practice innovative teaching techniques. The authors use in-depth classroom portraits from the outset of schoolwide lesson study and three years later to illuminate the changes in mathematics instruction at a school that raised its proficiency on Smarter Balanced Assessment from 15% to 56%. Extensive resources and

links are provided to help readers understand and build on the work of these schools which is grounded in established principles of collective efficacy intrinsic motivation and learner agency for both students and teachers Book Features Shows how teaching through problem solving can erase the achievement gap in mathematics learning Provides the first in depth portrait of schoolwide lesson study showing how U S teachers at several schools build it and use it to transform teaching Profiles teachers leading the transformation of instruction to achieve the ambitious vision of learning embodied in recent standards Uses photographs student work and detailed classroom descriptions to bring to life mathematics lessons in year 1 and year 4 of the school s work to build problem solving Provides examples and links to the strategies teachers use to make student thinking visible and actionable during mathematics lessons Includes lesson plans photographs of board work student journals school newsletters self assessment rubrics and dozens of links to the resources needed to begin using teaching through problem solving and school wide lesson study Provides long term teacher led solutions for professional learning and for mathematics instruction that have been shown to improve teacher retention and student proficiency
