## **Orientation Manual Reception Example:**

*Case Studies and Activities in Adult Education and Human Resource Development* Steven W. Schmidt, Kathleen P. King, 2010-09-01 Case studies have become a widely used instructional tool in many educational environments The use of case studies began in the 1950s at Harvard Business School Today they may be used as part of a course of study or as the main focus of a course to which other material is added While the use of case studies is prevalent in schools of business and medicine they are not often used in adult education or human resource development This may be because there are no current major publications that deal with the use of case studies in these disciplines nor are there any major databases of adult education or human resource development case studies for instructors to use Good case studies can bring reality into the classroom They can provide frameworks for discussion based on issues that must be faced in real life Complex case issues can be broken down and examined for greater understanding then pulled together again for resolution Case studies can be used successfully in adult education I propose a book based on the use of case based learning in adult education and human resource development HRD The book could be positioned as a supplement to course textbooks for courses in adult education and HRD I would write the cases and develop the exercises but could also get others to contribute a case study or exercise to the book Cases would each be a half page to maybe 2 3 pages at the long end and would include questions for students readers Supplementary information possibly in the form of a DVD could be put together for instructors This information would include case study focal points and examples of possible responses for each study exercise *U.S. Media and Migration* Sarah C. Bishop, 2015-12-22 Winner of the 2017 Outstanding Book Award from the National Communication Association's International and Intercultural Communication Division and the 2017 Sue DeWine Book Award from the NCA Applied Communication Division Using oral history ethnography and close readings of media Sarah C Bishop probes the myriad and sometimes conflicting ways refugees interpret and use mediated representations of life in the United States Guided by 74 refugee narrators from Bhutan Burma Iraq and Somalia U S Media and Migration explores answers to questions such as What does one learn from media about an unfamiliar place How does media help or hinder refugees sense of belonging after relocation And how does the U S government use media to shape refugees understanding of American norms standards and ideals With insights from refugees and resettlement administrators throughout Bishop provides a compelling and layered analysis of the interaction between refugees and U S media before during and long after resettlement Manual of Classification United States.
