Claim:

There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Aspects of the Dialogical Self Marie-Cécile Bertau, 2004-01-01 Aspects of the Dialogical Self is at the core a documentation of the outcome of a symposium held at the Second International Conference on the Dialogical Self 2002 Starting from a psycholinguistical and socio cultural approach its aim was to present several perspectives on the phenomenon of inner speech on the borders of communication and cognition and of individual and social

performances The symposium was concerned with the concept of development in different respects in regard to the relation between inner speech and literacy Juan Daniel Ramirez to questions and their special role for the dialogical self Marie C cile Bertau and to the role of mutuality in psychological growth Vera John Steiner The contributions are each followed by comments thereby conveying some orality and voicedness This core is surrounded by an introductory part depicting the theory of the dialogical self accompanied by a proposition on modeling Marie C cile Bertau and by an additional topic which is a quite important and complex issue for the dialogical self addressivity The first contribution tries to open up the horizon in which addressivity could be placed departing from philosophical considerations going via conversational analysis to developmental aspects Marie C cile Bertau This general approach is supplied by two contributions dealing with specific moments of addressivity the first one focuses on the special cases of open states of talk faked multiple addressing and self talk Heike Baldauf Quilliatre The second contribution Marta Soler Gallart could well be read as a complement to Ramirez s article since it deals with dialogical reading stating the transformative force of addressing Thus the book offers specific as well as general vistas of the dialogical self and of related questions such as ontogenetic and microgenetic development and conceptions of addressivity
