

NSAA CSA EXAM STUDY GUIDE

The NSAA exam is written by tenured CSA's and verified by physicians. A psychometrician then checks exam for form. We have worked with several of the NSAA approved Surgical Assisting Programs to develop questions that coincide with their curriculum.

SURGICAL ANATOMY: Anatomy is one of the most important components of this examination. Approximately one-third of the questions on this exam refer to the Anatomy Diagrams listed in our references at the end of this study guide.

This study guide reviews each section of the exam.

STUDY GUIDE

I. ANATOMY-HEART: Base and Posteroinferior

Suggestions: To study for this section, review heart anatomy using plate number 210 of Netter's (ref.1), or any Netter's edition with the plate for Heart: Base and Postero-inferior. This section is not an inclusive category of the heart or thorax. It is important to note that this section does not focus on procedures. It is strictly identification of the various parts of the Heart: Base and Posteroinferior.

[IMPORTANT] Know all detailed anatomy as is shown on this plate. Each question has four answers with only one most correct. Anatomy only. As is with most of the NSAA exam, the most correct answer is about surgical anatomy.

[IMPORTANT] Surgical anatomy is such anatomy identified, step by step, in a surgical procedure. **EXAMPLE:** What is the best answer for an important nerve to be avoided in the next layer of dissection?

Heart: Base and Diaphragmatic Surfaces
