Regional Conflicts James E. Goodby,1995 This is the second volume of a two part study on international issues in the post cold war era Ten authors consider regional conflicts how relations among the great powers could be affected by such conflicts and how co operation among the leading nations especially Russia and the United States might influence the course of regional strife The end of the cold war closed one chapter in history the global struggle between the USA and USSR It has not brought an end to regional conflicts This volume analyses three broad categories of regional conflicts Countries in the developing world where US and Russian interests are more or less equally engaged Countries of special interest to one or more of the great powers and Countries where there is no overriding Russian or US national security interest The challenge to US Russian co operation is examined under the major headings of preventive diplomacy in an era of high technology dilemmas of US Russian security co operation and international security organizations as instruments for great power co operation New Nukes Praful Bidwai,Achin Vanaik,2000 Nuclear tests in India and Pakistan brought the threat of nuclear

war back to the world's centre stage. The tests and nuclear moves have raised regional tension, increased poverty in already impoverished nations and could possibly have fuelled an arms race which goes beyond the borders of the two countries. This text examines the causes and consequences of India and Pakistani nuclear tests. The book provides a framework for understanding the global context of these tests and looks at approaches for nuclear abolition in Asia and the West. *Iran's Nuclear Program and the Global South* M. Onderco, 2015-06-25. This book studies the reactions of India, Brazil and South Africa, the three main non-proliferation actors of the Global South, to Iran's nuclear program. Their responses are explained and situated in wider foreign policy context. *Renegotiating the Nuclear Order* Tarja Cronberg, 2021-04-05. *Renegotiating the Nuclear Order* offers a sociological approach to the nuclear order and order defined by nuclear technology and nuclear weapons. The focus is on the need to renegotiate the nuclear order given the conflict between deterrence and disarmament and the unbalanced distribution of rights and responsibilities between the nuclear and non-nuclear states. The study applies the concepts of a relevant social group and a technological frame developed in the sociology of technology to the current competition between the Non-Proliferation Treaty and the Treaty on the Prohibition of Nuclear Weapons. The negotiations of the nuclear programs of North Korea and Iran form the empirical background. The policy challenges identified in the sociotechnical analysis are threefold. Firstly, there is the need to guarantee the credibility of the nuclear diplomacy in the gap between the military and the peaceful. Secondly, during the past 50 years, the rights of the non-nuclear states have been undermined while the nuclear weapon states have ignored their disarmament obligations. There is a need to renegotiate a new balance. Thirdly, the relationship between the two treaties has to be clarified. The proposal is to clearly separate the two into a comprehensive treaty on non-proliferation and to a verifiable treaty on prohibiting nuclear weapons. This book will be of much interest to students of security studies, arms control and disarmament, sociology, STS, Science Technology Society studies and International Relations. *Global Peace and Anti-nuclear Movements* Badruddin, 2003. This book presents in depth observation and analysis of global peace movement organizations both in historical as well as contemporary dimension. *Judge Antônio A. Cançado Trindade. The Construction of a Humanized International Law* Antônio Augusto Cançado Trindade, 2017-03-06. The current volume supplements Volume 1 and 2 of *The Construction of a Humanized International Law* which contains a selection of the Individual Opinions of Judge Antônio A. Cançado Trindade 1991-2013, former Judge and President of the Inter-American Court of Human Rights and since 2008 a Judge of the International Court of Justice. Volume 3 brings these texts up to date till 2015. Many dwell on aspects of the increased humanization of international law. Elevating this body of norms which have traditionally focused on purely inter-State relations to a level where individuals and their suffering projected in time become a primary concern is without doubt Antônio A. Cançado Trindade's major doctrinal contribution. His great achievement at the International Court of Justice has been to draw attention to this dimension and to further its development in the international case law in the light of the universal juridical

conscience and stressing the relevance of general principles of international law In a significant number of cases the World Court acts today as a human rights court dealing increasingly albeit under the traditional umbrella of inter State disputes with situations that involve human suffering and lead it to find human rights violations We also offer this title as part of a 3 volume set isbn 9789004375048

Nuclear Arms Control Tom Sauer, 1998-11-12 The proliferation of nuclear weapons has been defined as the gravest potential threat to international peace and security The concept of nuclear deterrence has to be revisited in this regard The longer the Nuclear Weapon States hold on to their nuclear weapons the bigger the chance that nuclear weapons will be spread and will be used once again by accident in an authorized or unauthorized way or that nuclear terrorism becomes reality The marginalizing of nuclear weapons resulting in a Nuclear Weapon Free World should be considered as a viable alternative

Networked Nonproliferation Michal Onderco, 2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty was extended indefinitely and without a vote Networked Nonproliferation offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With Networked Nonproliferation Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power

India's Ad Hoc Arsenal Chris Smith, 1994 Chris Smith explores the evolution of Indian defence policy since 1947 He looks carefully at the domestic dynamics of Indian defence policy This includes an in depth analysis of the period 1947-62 which is often ignored by Indian defence analysts and the performance of the defence industrial base He concludes that India's defence policy is designed more as one aspect of the quest for great power status than as an attempt to acquire security at an affordable price

Security and Arms Control in Post-confrontation Europe Jenonne Walker, 1994 The new dangers and challenges to international security in Europe after the Cold War are examined in this book The changing nature of Europe's security problems has necessitated new thinking among both civilians and the military about arms control the problems it should address the purposes it should serve and even what should be called arms control today Arms control should be seen as encompassing all aspects of the military dimension of the endeavours to mitigate or mediate tensions within states and to keep them from turning violent It entails joint management of the cold war legacy of nuclear and conventional weapons

Security and Arms Control in Post Confrontation Europe examines in particular the role which could and should be played by the Conference on Security and Co operation in Europe CSCE for the prevention of intra state armed conflicts **Die Nuklearwaffenpolitik Grossbritanniens und Frankreichs** Simone Wisotzki,2002 *Understanding International Law* Conway W. Henderson,2009-11-25 *Understanding International Law* presents a comprehensive accessible introduction to the various aspects of international law while addressing its interrelationship with world politics Presents well organized balanced coverage of all aspects of international law Features an accompanying website with direct access to court cases and study and discussion questions Visit the site at <http://www.wiley.com/go/internationallaw> *Understanding International Law* a Includes discussion of the efficacy of international law atopic unique among international law texts Offers discussion of other topics that most texts do not address such as complete chapters on making the world safer human rights the environment and the world economy *Nuclear Designs* Bruce Larkin,2018-04-17 Global politics has changed with unaccustomed swiftness since the end of the Cold War Eastern Europe is free the Soviet Union has broken up China presses free market economic reform and the United States and Russia have declared a joint commitment to end nuclear war The force of these changes has created a new agenda for global politics and security policy This does not mean that nuclear weapons have lost their centrality Nuclear development programs continue in the major holders of advanced weapons In Israel Pakistan India North Korea Iraq and Iran nuclear intentions are subject to widespread speculation and scrutiny Negotiations for renewal of the Nuclear Non Proliferation Treaty remind us that the treaty requires serious efforts to abolish nuclear weapons Nuclear Choices points out that the Cold War s end has not banished mistrust Instead it has opened the door to frank conversation about the usefulness of force and the need to address common fears States now face a global choice among alternative nuclear futures If they desire to avoid runaway nuclear development the choices come down to three the status quo disengagement or abolition Larkin argues that if they chose the status quo they elect a world in which only terror and self restraint keep devastation at bay a world in which instant destruction is possible This study focuses on the nuclear weapons programs of Great Britain China and France because they may be less familiar to students of international affairs Each of these countries has developed a substantial nuclear capability that could decisively shape the result of coming global nuclear decisions Larkin concludes that these three minipowers could conclude that nuclearism serves their interests refuse disengagement and encourage proliferation If they are prepared to abandon nuclearism they have tremendous political leverage on Russia the United States and also on undeclared and aspiring nuclear weapons states For now only the United Kingdom France and China maintain sufficient warhead inventories and production capabilities to have strong effects on how the United States and Russia view their own strategic capabilities Nuclear Choices asserts that governments polities and parties today do not know how to guarantee themselves against weapons of mass destruction They must either acquire the political and social means to achieve such guarantees or accept a world in which nuclearism will

continue to cast its shadow over all aspects of nation building. It will be of interest to political scientists, policymakers, military analysts and those interested in the nuclear issue. *Indian Foreign Policy* Chris Ogden, 2014-06-05. India is becoming an increasingly visible, powerful and influential state within the global system. As this rise to prominence continues, better appreciating the interests and principles that structure the international interactions of South Asia's largest state has never been so important. Keen to embrace an expectant future as a great power, India's transitional journey has been characterised by astounding diplomatic achievements and significant strategic failures. In this robust and comprehensive analysis, Chris Ogden introduces students to the key dimensions of Indian foreign policy from her emergence as a modern state in 1947 to the present day. Combining theoretical insight with numerous case studies and profiles, he examines the foreign policy making process, strategic thinking, the crucial search for economic growth and India's difficult regional position and troubled borders. Tracking the trajectory of one of the 21st century's major Asian and global powers, later chapters focus on New Delhi's multilateral interaction, great power dynamics and expanding relations with the United States and the world. Critically assessing what kind of great power India can and wants to be, this wide-ranging introduction will be an invaluable text for students of South Asian politics, foreign policy and international relations.
