## **Nuclear Proliferation And International Security:**

**Nuclear Proliferation and International Security** Sverre Lodgaard, Bremer Maerli, 2007-06-11 The Nuclear Non Proliferation Treaty has long been key in non proliferation and disarmament activities The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities In retrospect and despite setbacks the overall impact of the Nuclear Non Proliferation Treaty has been significant and gratifying Its continued success is by no means guaranteed As old nuclear dangers persist and new ones evolve policies to halt nuclear proliferation are more disparate than at any other time Nuclear weapons remain an essential part of the security policies of leading states and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities In search of an overarching strategy that recognizes both the flaws of the existing non proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty

*Nuclear Proliferation and International Order* Olav Njølstad, 2010-09-13 This book examines the state of the nuclear non proliferation regime and the issues it faces in the early 21st century Despite the fact that most countries in the world have signed the Non Proliferation Treaty NPT there is growing concern that the NPT is in serious trouble and may not be able to stop the further spread of nuclear weapons If so international stability will be undermined with potentially disastrous consequences and the vision of a nuclear weapon free world will become utterly unrealistic More specifically the NPT is exposed to four main challenges explored in this book challenges from outside as three countries that have not signed the Treaty Israel India and Pakistan are known to possess nuclear weapons challenges from within as some countries that have signed on to the Treaty as non nuclear weapons states have nevertheless developed or are suspected to be trying to develop nuclear weapons North Korea and Iran being cases in point challenges from below in the shape of terrorists and other non state actors who may want to acquire radioactive materials or even nuclear weapons and finally challenges from above due to the perceived failure of the five legal nuclear weapons states to keep their part of the double bargain made by the parties of the NPT and take serious steps towards nuclear disarmament This book will be of much interest to students of nuclear proliferation international security war and conflict studies and IR in general

**Handbook of Nuclear Proliferation** Harsh V Pant, 2012-02-27. The chapters of this proposed volume are intended to shed light on the diverse themes surrounding this very important issue area in international security. Each of the six major sections addresses an aspect of nuclear proliferation that will be critical in determining the future trajectory of global politics in the years to come. The first section examines the major thematic issues underlying the contemporary discourse on nuclear proliferation. How do we understand this period in proliferation? What accounts for a taboo on the use of nuclear weapons so far and will it survive? What is the present state of nuclear deterrence models built during the Cold War? What is the relationship between the pursuit of civilian nuclear energy and the risks of proliferation? Why are we witnessing a move away from non-proliferation to counter-proliferation? The second section gives an overview of the evolving nuclear policies of the five established nuclear powers: the USA, Russia, the United Kingdom, France, and the People's Republic of China. Section three looks at the three de facto nuclear states: India, Pakistan, and Israel. The fourth section examines the three problem areas in the proliferation matrix today: Iran, North Korea, and the potent mix of non-state actors and nuclear weapons. The fifth section sheds light on an important issue often ignored during discussions of nuclear proliferation: cases where states have made a deliberate policy choice of either renouncing their nuclear weapons programme or have decided to remain a threshold state. The cases of South Africa, Egypt, and Japan will be the focus of this section. The final section will examine the present state of the global nuclear non-proliferation regime, which most observers agree is currently facing a crisis of credibility. The three pillars of this regime: the Nuclear Non-Proliferation Treaty (NPT), the Comprehensive Test Ban Treaty (CTBT), and the Fissile Material Cut Off Treaty (FMCT) will be examined. This is followed by an analysis of the present trends and prospects for US-Russia nuclear arms control. The impact of missile defenses and the US-India civilian nuclear energy co-operation pact will be examined so as to ascertain whether they have weakened or strengthened the global non-proliferation regime. The chapters in this volume aim to document the increasing complexity of the global nuclear proliferation dynamic and the inability of the international community to come to terms with a rapidly changing strategic milieu. The future, in all likelihood, will be very different from the past, and the chapters in this volume will try to develop a framework that may help gain a better understanding of the forces that will shape the nuclear proliferation debate in the years to come.

*The Challenge of Abolishing Nuclear Weapons* David Krieger, 2017-07-05 In the more than sixty years since the advent of nuclear weapons there has been little meaningful progress toward nuclear disarmament Some countries have nuclear weapons while other states are forbidden to acquire them a status quo that lacks rational basis and cannot be sustained In this remarkable collection scholars and policy analysts argue that humankind has a choice either allow nuclear weapons to continue to proliferate throughout the world or move toward their complete elimination The vast majority of people on the planet would surely opt to abolish nuclear weapons But decisions about nuclear weapons are not made by the public but by small groups of political elites Consequently in a world with nuclear weapons the fate of humanity rests in the hands of a small number of individuals whose perceptions communications and judgment determine whether there is to be a future The contributors to this volume provide historical perspective on nuclear weapons policy explore the role of international law in furthering the prospects of nuclear weapons abolition consider the obstacles to abolition present a path to achieving a nuclear weapons free world and look beyond abolition to consider issues of post abolition sovereignty and general and complete disarmament The goal of a nuclear weapons free world can be awakened by an engaged citizenry bringing pressure from below in demanding action from political leaders This book contributes to this awakening and engagement
