Anthony H. Normore, Antonia Issa Lahera, 2018-09-01 *Crossing the Bridge of the Digital Divide* A Walk with Global Leaders explores the combined effect of the rapid growth of information as an increasingly fragmented information base a large component of which is available only to people with money and or acceptable institutional affiliations In the recent past the outcome of these challenges has been characterized as the digital divide between the information haves and have nots along racial and socio economic lines that seem to widen as time passes To address the issues of digital equity and digital inequality in an effort to bridge the digital divide educational scholars researchers and practitioners are in positions to ensure equitable opportunities are made available for people of all ages races ability sexual orientation and ethnicity in support of social justice for bridging the digital divide The digital divide addresses issues concerning equal opportunity equity and access that have an effect on the development of marginalized and otherwise disenfranchised populations within and across systems nationally and internationally The contributing authors representing United States Canada South Africa New Zealand and the UK posit that education institutions can serve as the bridge to close the digital divide for students who do not have access to information technology in their homes At a time when more computers are made available in schools than ever before the digital divide continues to widen and fewer people in the lowest SES groups are given the opportunity to join the world of computer technology and the internet As a result the influence of leadership activity on institutional racism gender discrimination inequality of opportunity inequity of educational processes digital exclusion and justice have gained currency and attention The contributing national and international authors examine the digital divide in terms of social justice leadership equity and access It is within this context that the authors offer discussions from a lens of their choice i.e. conceptual review of literature epistemological etc By adopting an educational approach to bridging the digital divide researchers and practitioners can connect and extend long established lines of conceptual and empirical inquiry aimed at improving organizational practices and thereby gain insights that might be otherwise overlooked or assumed This holds great promise for generating refining and testing theories of leadership for equity and access and helps strengthen already vibrant lines of inquiry on social justice

Theorizing Digital Divides Massimo Ragnedda, Glenn W. Muschert, 2017-09-22 Although discussion of the digital divide is a relatively new phenomenon social inequality is a deeply entrenched part of our current social world and is now reproduced in the digital sphere Such inequalities have been described in multiple traditions of social thought and theoretical approaches To move forward to a greater understanding of the nuanced dynamics of digital inequality we need the theoretical lenses to interpret the meaning of what has been observed as digital inequality This volume examines and explains the phenomenon of digital divides and digital inequalities from a theoretical perspective Indeed with there being a limited amount of theoretical research on the digital divide so far *Theorizing Digital Divides* seeks to collect and analyse different perspectives and theoretical approaches in analysing digital inequalities and thus propose a nuanced approach to study the digital divide Exploring theories from diverse perspectives within the social sciences whilst

presenting clear examples of how each theory is applied in digital divide research this book will appeal to scholars and undergraduate and postgraduate students interested in sociology of inequality digital culture Internet studies mass communication social theory sociology and media studies The Global eBook Market: Current Conditions & Future Projections Ruediger Wischenbart,2013-02-11 The Global eBook Report documents and analyses how ebook markets emerge in the US UK continental Europe Brazil China India Russia and the Arab world It combines the best available data and references to specialized local actors with thematic chapters focusing on critical policy debates and on key driving forces notably ebook bestsellers and pricing strategies across European markets self publishing government regulation piracy and the expanding impact of global players The Global eBook Report is available for download from October 1st 2013 at www.global-ebook.com A project of Ruediger Wischenbart Content and Consulting **OECD Skills Outlook 2023 Skills for a Resilient Green and Digital Transition** OECD,2023-11-06 Skills are vital for building resilient economies and societies By helping individuals develop a diverse range of skills and empowering them to apply these skills effectively skills policies play a crucial role in responding to emerging threats such as environmental degradation and harmful applications of technologies used to collect generate and exchange information This edition of the Skills Outlook highlights the importance of supporting individuals in acquiring a wide range of skills at varying levels of proficiency to promote economic and social resilience Additionally the report acknowledges the role of attitudes and dispositions in enabling skills development and effective skills use It also emphasises the need for policy makers to monitor the costs associated with policies aimed at promoting the green and digital transition and how the transition affects inequalities Training opportunities that respond to emerging labour market needs and efforts to facilitate their uptake can promote a just and inclusive green and digital transition In turn education systems that equip young people not only with skills but attitudes to manage change can ensure that the green and digital transition is sustainable in the longer term Advanced Language Technologies for Digital Libraries Raffaella Bernardi, Frederique Segond, Ilya Zaihrayeu,2011-10-14 This book constitutes the thoroughly refereed post proceedings of two international workshops on special aspects of digital libraries namely the First International Workshop on Natural Language Processing for Digital Libraries NLP4DL 2009 held in Viareggio Italy in June 2009 and the CACAO Project Workshop Advanced Technologies for Digital Libraries AT4DL 2009 held in Trento Italy in September 2009 A new open call was sent after the workshops The revised full papers presented at the workshops and the newly submitted ones went through two rounds of reviewing and revision The 10 papers selected address various aspects of NLP in digital libraries search classification and digital document processing *International Conference on Digital Libraries (ICDL) 2013* Shantanu Ganguly, P.
