(Hornbill) (Chapter – 5) (The Ailing Planet: the Green Movement's Role) (Class – XI)

Understanding the Text

Question 1:

Locate the lines in the text that support the title 'The Ailing Planet'.

Answer 1:

Lines that support the title are:

- The earth's vital signs reveal a patient in declining health
- Are we to leave our successors a scorched planet of advancing deserts, impoverished landscapes and ailing environment?
- When this happens, fisheries collapse, forests disappear, grasslands are converted into barren wastelands, and croplands deteriorate.
- The actual loss of forests is estimated to be about eight times the rate indicated by government statistics.

Question 2:

What does the notice "The World's most dangerous animal" at a cage in the zoo at Lusaka, Zambia, signify?

Answer 2:

This line, written on the notice board outside the cage in a zoo in Zambia, is written to tell the reality of humans. How human beings have destroyed the resources of earth and harmed the environment in order to fulfill their needs, right after the attainment of civilization. We are undoubtedly the biggest and most dangerous animals because there is no more danger to the earth than any other animal than us. We are responsible not only for our earth but also for the elimination of the entire human race. With this notice, the zoo management and administration is doing a great job of making people aware of nature.

Question 3:

How are the earth's principal biological systems being depleted?

Answer 3:

Mr. Lester R Brown, an American environmentalist through his book 'The Global Economic Prospect' lays importance on four prime biological systems which are – Fisheries, Forests, Grasslands and Croplands. He considers it as 'four pillars of the global economic system'. Apart from supplying our food, they supply raw materials for industry. It is natural that these will extinct where there is uncontrolled human exploitation with resources. In such scenarios, fisheries may collapse and forests will disappear with descend in croplands & grasslands. For the sake of obtaining firewood, enormous forests are cleared every day. Human beings have given the name of development to playing with the environment. In order to better understand the trouble, we have made for our biological system, we must look at science journals issued by Scientists across the globe after rigorous research in Antarctica for last two decades.

Question 4:

Why does the author aver that the growth of the world population is one of the strongest factors distorting the future of human society?

Answer 4:

Population growth is the increase in the number of humans on Earth. For most of human history our population size was relatively stable. But with innovation and industrialization, energy, food, water, and medical care became more available and reliable. Consequently, global human population rapidly
