Radio's America Bruce Lenthall, 2008-11-15 Orson Welles's greatest breakthrough into the popular consciousness occurred in 1938 three years before Citizen Kane when his War of the Worlds radio broadcast succeeded so spectacularly that terrified listeners believed they were hearing a genuine report of an alien invasion a landmark in the history of radio's powerful relationship with its audience In Radio's America Bruce Lenthall documents the enormous impact radio had on the lives of Depression era Americans and charts the formative years of our modern mass culture Many Americans became alienated from their government and economy in the twentieth century and Lenthall explains that radio's appeal came from its capability to personalize an increasingly impersonal public arena His depictions of such figures as proto Fascist Charles Coughlin and medical quack John Brinkley offer penetrating insight into radio's use as a persuasive tool and Lenthall's book is unique in its exploration of how ordinary Americans made radio a part of their lives Television inherited radio's cultural role and as the voting tallies for American Idol attest broadcasting continues to occupy a powerfully intimate place in American life Radio's America reveals how the connections between power and mass media began

Contesting Trade in Central America Rose J. Spalding, 2014-04-15 In 2004 the United States five Central American countries and the Dominican Republic signed the Central American Free Trade Agreement CAFTA signaling the region's commitment to a neoliberal economic model For many however neoliberalism had lost its luster as the new century dawned and resistance movements began to gather force Contesting Trade in Central America is the first book length study of the debate over CAFTA tracing the agreement's drafting its passage and its aftermath across Central America Rose J Spalding draws on nearly two hundred interviews with representatives from government business civil society and social movements to analyze the relationship between the advance of free market reform in Central America and the parallel rise of resistance movements She views this dynamic through the lens of Karl

Polanyi's double movement theory which posits that significant shifts toward market economics will trigger oppositional self-protective social countermovements. Examining the negotiations, political dynamics and agents involved in the passage of CAFTA in Costa Rica, El Salvador and Nicaragua, Spalding argues that CAFTA served as a high profile symbol against which Central American oppositions could rally. Ultimately, she writes, post-neoliberal reform involves not just the design of appropriate policy mixes and sequences but also the hard work of building sustainable and inclusive political coalitions, ones that prioritize the quality of social bonds over raw economic freedom. Making It in America Rachel Slade, 2025-06-10. A moving and eye-opening look at the story of manufacturing in America, whether it can ever successfully return to our shores and why our nation depends on it, told through the experience of one young couple in Maine as they attempt to rebuild a lost industry ethically. From the best-selling author of *Into the Raging Sea*, Ben Waxman spent a decade organizing workers in Pennsylvania, Ohio and Wisconsin, fighting for men and women at a time when national support for unions had sunk to an all-time low. Frustrated with the state of the world, he lands back in his hometown of Portland, Maine, to rethink his life. There he meets Whitney Reynolds, a restless bartender eager for a challenge. In each other, they see a better future, a version of the American dream they can build together. Ben and Whitney set out to prove that union-made, all-American sourced apparel manufacturing is possible in the twenty-first century. Their quest takes us across the nation and across time, from the cotton fields of Mississippi to the hollowed-out garment district in New York City, to a family-owned zipper company in Los Angeles, to the enormous knit and dye houses in North Carolina. While battling anti-immigrant hostility, trade wars and a global pandemic, they grapple with the true meaning of made in USA in our globalized world. *Making It in America* offers a fascinating new take on free trade, economics and manufacturing history. Woven through the Waxmans' journey is the essential story of textiles and their critical role in shaping capitalism. It was the demand for cheap cloth that sparked the Industrial Revolution. It was the brutal conditions in New England's textile mills that first drove workers to organize. *Making It in America* is a deeply personal account of how individual choices shape a nation. Each touchpoint casts a rare

compassionate look at what came before where we are now and where we're going through the people places and ecologies that produce the fabric of our lives
