Arif, 2025-04-29 Comprehensive accessible introduction to deep learning for engineering tasks through Python programming low cost hardware and freely available software Deep Learning On Embedded Systems is a comprehensive guide to the practical implementation of deep learning for engineering tasks through computers and embedded hardware such as Raspberry Pi and Nvidia Jetson Nano After an introduction to the field the book provides fundamental knowledge on deep learning convolutional and recurrent neural networks computer vision and basics of Linux terminal and docker engines This book shows detailed setup steps of Jetson Nano and Raspberry Pi for utilizing essential frameworks such as PyTorch and OpenCV GPU configuration and dependency installation procedure for using PyTorch is also discussed allowing newcomers to seamlessly navigate the learning curve A

key challenge of utilizing deep learning on embedded systems is managing limited GPU and memory resources This book outlines a strategy of training complex models on a desktop computer and transferring them to embedded systems for inference Also students and researchers often face difficulties with the varying probabilistic theories and notations found in data science literature To simplify this the book mainly focuses on the practical implementation part of deep learning using Python programming low cost hardware and freely available software such as Anaconda and Visual Studio Code To aid in reader learning questions and answers are included at the end of most chapters Written by a highly qualified author Deep Learning On Embedded Systems includes discussion on Fundamentals of deep learning including neurons and layers activation functions network architectures hyperparameter tuning and convolutional and recurrent neural networks CNNs RNNs PyTorch OpenCV and other essential framework setups for deep transfer learning along with Linux terminal operations docker engine docker images and virtual environments in embedded devices Training models for image classification and object detection with classification then converting trained PyTorch models to ONNX format for efficient deployment on Jetson Nano and Raspberry Pi Deep Learning On Embedded Systems serves as an excellent introduction to the field for undergraduate engineering students seeking to learn deep learning implementations for their senior capstone or class projects and graduate researchers and educators who wish to implement deep learning in their research

ANALYSIS AND APPROACH FOR SCHEMATIC DESIGN OF VIRTUAL WIRELESS SENSOR NETWORK Dr. Rahul Pethe, 2022-07-25 A wireless sensor network is a promising communication technique in many fields of applications but the energy constrained characteristic of sensor nodes is one of the critical issues we must consider in designing a network In each network a node is typically powered by a battery with a limited energy supply in such case cooperative broadcasting using virtualization of resources plays a significant role in saving transmission power consumption Sensor networks have limited resources and often support large scale applications that need scalable propagation of sensor data This proposed work is meant to provide the architecture for scalable and adaptive communication in large scale sensor networks also for

enhancing the utility of the wireless communication Sensor Network using virtual concepts and virtual Network platforms

Automating Building Energy Management for Accelerated Building Decarbonization: System Architecture and the Network Layer James Kempf, 2025-01-22

Complete up to date reference on system architecture for building energy management systems Automating Building Energy Management for Accelerated Building Decarbonization delivers detailed technical information on building energy management control technology and guidelines to implementing and deploying building energy management systems The book provides a detailed look at the system architecture of cloud based building energy management systems and a comprehensive review of technology for the networking layer from the link layer through the application layer Wired and wireless link layer protocols and Internet network layer protocols from the TCP/IP suite are thoroughly reviewed and discussed in the context of deploying an in building operational technology network At the application layer BACnet for large commercial and government buildings and Bluetooth Low Energy Zigbee and Matter for smaller commercial and residential buildings are discussed in detail with focus on energy management and building decarbonization The API standards OpenAPI 3.1 and AsyncAPI 3.0 are used to define example APIs for controlling an HVAC system illustrating how to provide API abstractions that simplify the development of building energy management applications and services Finally a discussion of controlling onsite distributed energy resources such as solar panels and on site battery storage through SunSpec Modbus and communicating with the utility through OpenADR and IEEE 2030.5 provide a solid technical foundation for implementing communication services in demand response and flexible load applications Security is emphasized as a key property for the operational technology networks that run building energy systems up and down the stack At the architectural level security functions including data origin authentication confidentiality protection and key exchange are discussed in detail Detailed information on security protocols including IPsec at the network layer TLS at the transport layer and OAuth2.0 at the application layer is presented In addition advice on deploying security solutions in building energy management networks is provided Throughout the book QR codes provide access to short videos about topics where more depth is needed or that are only briefly covered These allow the reader to view more information about important topics Automating Building Energy

Management for Accelerated Building Decarbonization is an essential resource for managers engineers and other professionals involved in designing and building energy management services for commercial and residential buildings It is also an excellent reference for university and training courses related to building decarbonization and renewable energy
