

Where can I see Wedges?

Story By: Andrew Frinkle

Jane was hunting for shapes yet again!
This time, she was looking for wedges.
She had to find wedges all around her.
Where were they hiding?
Could she find a lot of them or just a few?

She understood that a wedge was like a triangle.
It had a pointy end and two flat sides, but the last side was curved.
She'd seen this shape many of times in foods...
Pizza looked like a triangle, but the crust was rounded.
Slices of pies and cakes were the same way.
When she had a snack at home, her mother cut the oranges into wedges.
These were wedges, but where else could she find wedges?

She sat looking at the clock and thought about wedges.
Then, she realized that she saw a wedge on the clock.
The second and the minute hands made the sides.
The edge of the clock was the rounded part.

Later, when she was getting on her bike, she found another one!
The spokes going out from the center of the wheel made the sides.
The rounded part was the wheel.
There were really dozens of wedges on a bike tire if you thought about it.

Wedges weren't the easiest thing to find, but you could find some if you knew where to look.
