

Leather Boots Tutorial by onunoxu

1. Lineart

Keep the lineart simple as the majority of the details will be painted in later steps.

2. Flat Color

Although the softer lineart mostly disappears around the edges, the details on the inside can still be seen.

3. Eyelets

I rarely use lineart for small metal pieces. This simplifies everything and looks cleaner.

4. Laces

I prefer to do the laces in two parts, as shown in blue and red. Having them separated this way makes it much easier to adjust later if needed as opposed to having them all on one layer.

5. Sheen

This can be done with either a very soft brush or a normal brush with some blur applied to the edges and reduced layer opacity. Grainy texture placed sparingly helps to break up the smoothness and adds interest.

6. Depth

Add an extra layer of depth by adding a darker outline around wherever the sheen is. This can be painted in by hand or done with an Outer Glow effect if your program supports that feature.

Firefighter Basic Training Course United States. Department of Agriculture, 1975 **B-29 Airplane Commander Training Manual** United States Air Force, 2008-09. The Boeing B-29 was one of the most sophisticated aircraft of WWII. It featured many innovations, including guns that could be fired by remote control and pressurized crew compartments. It was also the heaviest production plane of the war, with terrific range and bomb-carrying capabilities. Carrying a crew of ten, the Superfortress devastated Japan in a series of raids in 1944-45. Finally, in August of 1945, the B-29s Enola Gay and Bock's Car dropped the atomic bombs and forced Japan to surrender. Originally printed by the U.S. Army Air Force, this B-29 Airplane Commander Pilot's Training Manual taught pilots everything they needed to know about the Superfortress. Classified Restricted, the text was declassified long ago and is here reprinted in book form. This impressive 8.5x11 facsimile presents the manual in its entirety. It features over 200 black and white pages of pilot and crew information and puts you right in the cockpit of one of history's great planes. **Marine Physical Readiness Training for Combat**, 1988 **Reserve Officer Training Corps Manual** United States. Department of the Army, 1972. Intermediate Leadership Development is the subject of this Reserve Officers Training Corps manual, which is designed to be used as a textbook. The individual actions which protect a soldier and make him effective in small units are discussed in Part One. Part Two is concerned with techniques of military instruction and provides suggestions for military instructors. Individual and crew-served weapons and antipersonnel tank mines are the subjects of Part Three. For related document, see AC 012 899.

Downhill ski technique, step by step Janos Koranyi, 2019-04-20. This book is especially written for all insecure skiers in the first place. If you think that you are a beginner or an intermediate skier, this book is thought to be the right choice for you. But everyone interested in understanding, developing, learning, and teaching downhill skiing can benefit from this work. I have

been working on this material since 2010 and the work is still going on My basic point is that you should prepare yourself before you go to ski It is too late to make your mental preparation on the slopes this should be done at home before You should be able to imagine for yourself what you must do in order to do it right or as good as possible This imagination should not be just a picture It should be like a whole movie with many of your senses involved just like in a detailed dream Like if you can imagine the whole ski turn with many clear details what basic movements you have to do how it should feel in your body how it should look like how it should change during the development of your turn this will prepare your correct movements in the real life But this must happen step by step starting by the easiest skills and developing further when you have tried out the first steps first For this reason I have divided the material in 3 different levels You will need quite a long time for this So please be patient take your time work with my book do not just read it Understanding and explaining skiing is complicated and it takes time My suggestion is to read carefully take several breaks and think carefully about the sections you find difficult to understand If you are a beginner start reading the book as soon as possible before your start your skiing You can stop reading after the beginner level and go skiing on green and blue slopes The homepage of the book <https://skiingtechnique.wordpress.com> If this link does not work write the link into an internet browser google or other You can also find a short free book about downhill ski tech on my homepage
