

Find the Time Zone

A time zone is a region that observes a uniform standard of time. While some countries have a single time zone, other countries like the United States span several time zones.

If it's 1:00 in the Pacific time zone, it's 2:00 in the mountain time zone, 3:00 in the central time zone, and 4:00 in the eastern time zone.

DIRECTIONS: Use the map of the continental United States to answer the questions.

Example: If it is 8:00 a.m. in Chicago, what time is it in Seattle? 6:00 a.m.

1. If it's 5:00 a.m. in New York City, what time is it in St. Louis? _____
2. If it is 9:30 p.m. in San Francisco, what time is it in Atlanta? _____
3. Imagine you're in New Orleans, and your friend in Denver asked you to call her at 4:00 p.m. mountain time. What time will it be in New Orleans when you call? _____
4. Pretend you're flying from Cleveland to Salt Lake City. It's a four-hour flight, and you leave at 8:00 a.m. What time will it be in Salt Lake City when you land? _____
5. Pretend you're flying from Los Angeles to Boston. It's a six-hour flight, and you leave at 11:30 a.m. What time will it be in Boston when you land? _____

Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children s love of games songs and movement he s proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It s no lonver just their teacher s math It s their math America s children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That s acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don t You know that to be true if you ve ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like 5 7 12 17 8 9 6 X 7 42 and 56 7 8 and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget

Being Black in America's Schools Brian Rashad Fuller, 2025-07-29 For readers of The Knowledge Gap Race to the Bottom and The Inequality Machine education and equity strategist Brian Rashad Fuller sheds a stark light on America s public schools the miseducation of students of color and the action required to make tangible changes and reforms to a failing and racialized educational system With a foreword from Harriet Tubman s great grand nephew Abdul Tubman In a polarizing and racially divided America what do children of color learn about themselves before they even go to school How do they see themselves and is that image only exacerbated by spending twelve years in a public education system that perpetuates negative stereotypes Brian Rashad Fuller personally knows that the impact of low expectations can be devastating as proved by the school to prison pipeline that so many students have experienced He aims to make a difference in this humanizing and very personal portrayal of what it means to be Black in America s schools As a Black man who has spent his life as a student and an educator Brian shares his own story of navigating the world overcoming his family struggles and eventually entering an educational system that he believes is inherently racist damaging and disserving He exposes the challenges Black students face in elite and predominantly white

universities and spaces dissects Black exceptionalism in the schooling experience and offers a firsthand account of the emotional and psychological impact made by teachers administrators policies practices lessons and student interactions Most Americans are looking for answers on how to improve our education system as illustrated by the critical race theory debate but have not fully understood the lived Black experience until now With powerful insight into a thoroughly American institution Brian offers present day solutions and liberating hope for a centuries long issue as well as a galvanizing and radical step forward It is a book essential to our challenging times
