Nec3 Professional Services Contract:

Practical Guide to the NEC3 Professional Services Contract Michael Rowlinson, 2012-05-08 Currently in its third edition the NEC suite has become one of the UK's leading families of standard forms of contract for major construction and civil engineering projects. Part of the NEC suite the Professional Services Contract (PSC) was drafted with the same process-based approach and objectives offering a standard contract for the appointment of consultants providing professional services in an engineering or construction project. Embodying best practice in terms of project management, the basic philosophy of the PSC differs from the principles and approach of other standard contracts used to appoint consultants. This book is a practical guide to the application of the PSC. Starting with a brief discussion of the background and philosophy behind the PSC, it identifies the roles and responsibilities of each of the named functions within the contract, explains the approaches required to achieve a successful working relationship between all parties, and examines all the procedures in the PSC. The book explains the links between the various sections of the contract to assist the reader with cross-referencing and covers all the variations created by the Main and Secondary Options. As a very practical guide, it will aid users in the transition from their use and understanding of the other standard contracts to the collaborative project management-based approach of the PSC. Written for anyone working in the construction and related industries using the PSC to procure or provide consultancy services in relation to a construction project, it will be of interest to the complete construction supply chain, particularly architects, structural engineers, services M/E engineers, civil engineers, quantity surveyors, and interior designers, together with Contractors and Sub-Contractors who have a design liability and employ consultants to assist them. It will also be of interest to consultants and lawyers advising any of these parties either in the preparation of contract documentation or the resolution of problem situations which may arise.

Understanding NEC3 : Professional Services Contract Kelvin Hughes, 2013-08-15 As use of the NEC, formerly the New Engineering Contract family of contracts, continues to grow worldwide, so does the importance of understanding its clauses and nuances to everyone working in the built environment. Currently in its third edition, this set of contracts is different to others in concept as well as format, so users may well find themselves needing a helping hand along the way. *Understanding NEC3 Professional Services Contract* uses plain English to lead the reader through the NEC3 Professional Services Contract's key features, including Main and Secondary Options, the use of early warnings, programme provisions, payment, compensation events, preparing and assessing tenders. Common problems experienced when using the Professional Services Contract are signalled to the reader throughout, and the correct way of reading each clause is explained. The ways in which the contract affects procurement processes, dispute resolution, project management, and risk management are all addressed in order to direct the user to best practice. Written for construction professionals by a practising international construction contract consultant, this handbook is the most straightforward, balanced, and practical guide to the NEC3 PSC available. It is an ideal companion for Employers, Consultants,

Contractors Engineers Architects Quantity Surveyors Subcontractors and anyone else interested in working successfully with the NEC3 PSC

Choosing the Right NEC Contract T. W. Weddell, Bill Weddell, 2006 **UNIQUE FEATURES** Designed to be used as a desk top manual Describes the main features of the contracts in the NEC family Includes guidance on which NEC contract is appropriate for a particular project and how to prepare it Useful for those who need more information about the NEC and its philosophy Includes exercises at the end of several chapters to stimulate discussions about the many factors that need to be considered in choosing the right NEC contract

BACKGROUND INFORMATION The last decades of the twentieth century saw huge changes in construction in the UK particularly in procurement methods and contract strategy In this book the author describes these changes as a construction reformation and suggests that the advent of the NEC played an important part in promoting those changes Since its introduction to the construction sector in 1991 the NEC has been highly recommended in the Latham Report and more recently by the Office of Government Commerce and is now widely used on many small and large projects in the UK and worldwide

ENSURING PROJECT OBJECTIVES In this guide Bill Weddell a long standing member of the NEC Panel and a highly respected consultant and trainer on the NEC utilises his skills and wide knowledge of the NEC to provide new and existing users with guidance on how to select and implement NEC

contracts to suit differing project needs and objectives

ACCURATE CONTRACT STRATEGIES This guide explains in a concise and practical manner how to decide on the appropriate contract strategy for any given project and how to prepare the contract document for each type of NEC contract It describes each of the documents and explains the selection methods for the various options and how these are used to produce the contract document The book also clarifies some of the distinguishing features of the NEC contracts in contrast to the more traditional standard forms and explains how the management procedures in each contract can be used to achieve the Employer's objectives by effective control of time cost and quality

THE READERSHIP This guide is a valuable tool for anybody involved in the NEC supply chain including clients consultants contractors subcontractors project managers quantity surveyors adjudicators and service suppliers across the complete spectrum of construction activity

ABOUT THE AUTHOR Bill Weddell was on the original NEC Working Group and drafting team and has been involved in the later development of the NEC family of contracts up to the publication of NEC3 He has long experience of both design and construction of major civil engineering works including highways bridges docks and harbours tunnels and sea defence works He was Head of Contracts for a firm of consulting engineers and is now a contract consultant and runs training courses on the NEC
