Toward a Geography of Art Thomas DaCosta Kaufmann, 2004-03-14 Art history traditionally classifies works of art by country as well as period but often political borders and cultural boundaries are highly complex and fluid Questions of identity policy and exchange make it difficult to determine the place of art and often the art itself results from these conflicts of geography and culture Addressing an important approach to art history Thomas DaCosta Kaufmann's book offers essays that focus on the intricacies of accounting for the geographical dimension of art history during the early modern period in Europe Latin America and Asia *Toward a Geography of Art* presents a historical overview of these complexities debates contemporary concerns and completes its exploration with a diverse collection of case studies Employing the author's expertise in a variety of fields the book delves into critical issues such as transculturation of indigenous traditions mestizaje the artistic metropolis artistic diffusion transfer circulation subversion and center and periphery What results is a foundational study that establishes the geography of art as a subject and forces us to reconsider assumptions about the place of art that underlie the longstanding narratives of art history [Getty Research Journal, No. 13](#)

Havoc, Thy Name Is Twenty-First Century! Peter Pogany, 2015-10-16 Just to maintain our standard of living we need to grow the worldwide economy at an unsustainable rate As we seek to hit such lofty targets were bound to deplete our resources and cause environmental crises on a scale that we have never seen before Revolutions terrorism and wars will follow Peter Pogany examines the problems we face and argues that human culture is governed by thermodynamic cycles of steady states interrupted by chaotic transitions Specifically he postulates that a steady state was interrupted by World War I with a chaotic transition following World War II which has led us to the current world order His theory predicts that global society is drifting toward a new form of self organization that will recognize limits to demographic economic expansion but only after we go through a new chaotic transition that will start sometime between now and the 2030s

Havoc They Name is Twenty First Century delivers sobering thoughts on where the world is headed but it also offers a glimpse of a bright future that we can embrace once we get through the darkness to come

Becoming Visible in Iran Mehri Honarbin-Holliday, 2009-02-28 The state of women in Islamic societies is the subject of much interest and heated debate Yet these discussions and representations in the media and elsewhere rely on inadequate information and misperceptions imagining Muslim women as oppressed victims in need of liberation by outside forces

Becoming Visible in Iran disputes these widespread stereotypes providing a vivid account of women in contemporary Iran as they go about their daily lives Beginning at home women are infusing dramatic change by challenging the patriarchal conceptions of their fathers brothers uncles and others within the intimate sphere of family and home Empowered by education they transport the power of their minds and being from the domestic to the public and political Mehri Honarbin Holliday presents the experiences of these young women who wield a key if indirect political influence on the seemingly male dominated politics of this society as they achieve a new visibility She shows us how women understand their place in contemporary Iranian society and how they interrogate it making demands for shifts in attitudes and behaviours both at home in relation to male relatives and in the wider world Women's daily existence weaves between the public and the private from home to classrooms parks metros cafes and taxis negotiating socio political limitations and the current regime's policies of female invisibility Detailed interviews and striking narratives draw our attention to the women's reflexive and critical stance and their desires to be recognized as independent and active architects of their own personal lives whilst also contributing to the discourses of change and a more just civil society From this fieldwork and focusing especially on young women Honarbin Holliday presents women's views on such key topics as public visibility body presentation and sexual curiosity in addition to education civil

society and political and social change Highlighting links and continuities with the history of women in Iran from the early twentieth century to the present moment she shows how Iranian women today strive to be the author of one's fate to resist narrow interpretations of religion to conduct meaningful rich and complex lives to bring about change in the mindsets of male relatives and to contribute to legal and political debates in the country For its direct presentation of women's voices as well as its analysis and insight this book is a vital contribution to our understanding of the lives of Muslim women and the possibilities before them today *Becoming Visible in Iran* is indispensable for those concerned with women in Islamic societies gender studies sociology anthropology as well as Iran and the Middle East *Geography and Technology* Stanley D. Brunn, Susan L. Cutter, James W. Harrington, 2004-03-31 This volume celebrates the 100th anniversary of the Association of American Geographers It recognizes the importance of technologies in the production of geographical knowledge The original chapters presented here examine technologies that have affected geography as a discipline Among the technologies discussed are cartography the camera aerial photography computers and other computer related tools The contributors address the impact of such technologies on geography and society disciplinary inquiries into the social technological interfaces high tech as well low tech societies and applications of technologies to the public and private sectors *Geography and Technology* can be used as a textbook in geography courses and seminars investigating specific technologies and the impacts of technologies on society and policy It will also be useful for those in the humanities social policy and engineering sciences planning and development fields where technology questions are becoming of increased importance *Geography* clearly has much to learn from other disciplines and fields about geography technology linkages others can likewise learn much from us
