Empire of AI Karen Hao, 2025-05-20. An Instant New York Times Bestseller. A bestselling page-turner that has made waves not just in Silicon Valley but around the world. With *Empire of AI*, Hao is fundamentally shaping many people's perceptions and understanding of the company at the center of the AI revolution. TIME Magazine, TIME100 AI 2025. Excellent and deeply reported. Tim Wu, The New York Times. Startling and intensely researched, an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us. Vulture. Hao's reporting inside OpenAI is exceptional, and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment. Benjamin Wallace Wells, New Yorker. From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning, an eye-opening account of arguably the most fateful tech arms race in history, reshaping the planet in real time from the cockpit of the company that is driving the frenzy. When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019, she thought they were the good guys. Founded as a nonprofit with safety enshrined as its core mission, the organization was meant, its leader Sam Altman told us, to act as a check against more purely mercantile and potentially dangerous forces. What could go wrong? Over time, Hao began to wrestle ever more deeply with that question. Increasingly, she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources: the compute power of high-end chips and the processing capacity to create massive large language models; the sheer volume of data that needs to be amassed at scale; the humans cleaning up that data for sweatshop wages throughout the Global South; and a truly alarming spike in the usage of energy and water underlying it all. The truth is that we have entered a new and ominous age of empire, only a small handful of globally scaled companies can even enter the field of play. At the head of the pack, with its ChatGPT breakthrough, how would OpenAI resist such temptations? Spoiler alert: it didn't. Armed with Microsoft's billions, OpenAI is setting a breakneck pace, chased by a small group of the most valuable companies in human history toward what end, not even they can define. All this time, Hao has maintained her deep sourcing within the company and the industry, and so she was in intimate contact with the

story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens *Empire of AI pierces the veil of the industry defining our era* *ChatGPT eBook*

Information and Power Elad Segev, 2025-05-12 This accessible and original book offers a novel analytical framework for understanding the relationship between information and power as the tension between popular and personal stories. *Information and Power: Popular and Personal Storytelling in the Digital Age* describes the relationship between information and power as a pendulum that constantly shifts from popular to personal stories and never reaches its balance. Through four detailed chapters each framed as a question the book looks at the past, present and future challenges of Western societies. It examines the ever growing commercialization, selfie culture, influencers, fake news and misinformation, hate speech, national identity, international conflicts and the race of big tech companies to develop the next generation of artificial intelligence. All those seemingly unrelated topics are explained through a single prism: the tension between popular and personal stories and our search for more meaningful identities. Finally the book offers various ways to address these issues by promoting modesty and trust through education and regulations as well as future technology design and usage. Written in accessible language and requiring no prior knowledge of the field this book is intended for undergraduate students in communication and media studies, sociology, political science, international relations and all those interested in the issues it addresses.

Supremacy Parmy Olson, 2024-09-10 WINNER OF THE THE FINANCIAL TIMES AND SCHRODERS 2024 BUSINESS BOOK OF THE YEAR AWARD. In November of 2022, a webpage was posted online with a simple text box. It was an AI chatbot called ChatGPT and was unlike any app people had used before. It was more human than a customer service agent, more convenient than a Google search. Behind the scenes, battles for control and prestige between the world's two leading AI firms, OpenAI and DeepMind, who now steers Google's AI efforts, has remained elusive until now. In *Supremacy*, Olson, tech writer at Bloomberg, tells the astonishing story of the battle between these two AI firms, their struggles to use their tech for good and the hazardous direction they could go as they serve two tech Goliaths whose power is unprecedented in history. The story focuses on the continuing rivalry of two key CEOs at the center of it all, who cultivated a religion around their mission to build god-like super intelligent machines: Sam Altman, CEO of OpenAI, and Demis Hassabis, the CEO of DeepMind. *Supremacy* sharply alerts readers to the real threat of artificial intelligence that its top creators are ignoring: the profit-driven spread of flawed and biased technology into industries, education, media, and more. With exclusive access to a network of high-ranking sources, Parmy Olson uses her 13 years of experience covering technology to bring to light the exploitation of the greatest invention in human history and how it will impact us all. *Humanocracy, Updated and Expanded* Gary Hamel, Michele Zanini, 2025-08-26. A powerful new edition of the Wall Street Journal bestseller that helps leaders build radically more human and capable organizations. Now more than ever, we need organizations that are daring, resilient, and creative. Unfortunately, when confronted by unprecedented challenges, most companies and institutions prove to be timid, plodding, and orthodox. The culprit is bureaucracy. With its top-down power structures and rule-choked systems, bureaucracy hobbles ingenuity and innovation. In a time of upheaval, these long-tolerated impediments are fast becoming competitively and economically untenable. Humanity needs and deserves something better. In *Humanocracy*, Gary Hamel and Michele Zanini make a passionate, data-driven argument for uninstalling bureaucracy and reinventing management as we know it. In this extensively updated and expanded edition, readers will find new and compelling case studies, the latest research findings, and a wealth of fresh and provocative insights. *Humanocracy* is both a manifesto for institutional renewal and a blueprint for building organizations that are as courageous, energetic, and ingenious as the people inside them. Essential building blocks include

Motivation Rallying colleagues to the challenge of reimagining management as usual Models Leveraging the experience of vanguard organizations that have successfully disrupted the bureaucratic status quo Mindsets Escaping the industrial age thinking that undermines the quest to build radically more capable organizations Mobilization Activating a pro change coalition to hack outmoded management systems and processes Migration Embedding the principles of humanocracy ownership markets meritocracy community openness experimentation and paradox in your organization s DNA If you ve finally run out of patience with bureaucratic bullshit if you re eager to build an organization that can outrun change and outperform expectations if you believe every team member deserves the chance to do something extraordinary then this book s for you
