Watching for the Morning Vaneetha Risner, 2025-05-06 Have your tears lasted more than a night as you've been watching for the morning Does the waiting feel too hard and God too distant Waiting watching hoping these words describe how Vaneetha lived for years after her once comfortable life dissolved in front of her She pleaded with God to fix her situation and stop the pain in the midst of an escalating illness the death of a child and an unwanted divorce But instead of doing what she asked for God gave her something even more wonderful He offered Himself This devotional will help you find hope in whatever you're facing today as it grapples with the inevitable questions How do we embrace the present moment with its pain and imperfections instead of just waiting for our problems to disappear How do we live with uncertainty trusting that God is doing something beautiful in what appears to be an empty silence How do we wait for God satisfied in him alone without insisting on the outcome we want These 90 devotions are for anyone who is waiting in the dark wondering when life will get better Some reflections will encourage you to press on some will help you process your losses others will make you laugh and still others will show you the gift of lament in both its grittiness and grace Ultimately they're all intended to draw you closer to the God who is always for you who is nearer than you know and loves you more than you can imagine Weeping may last for the night but joy comes in the morning Psalm 30:5 New Ideas from Dead Economists Todd G.

in just seconds surface every detail of a person's online life: their name, social media profiles, friends and family members, home address, and photos that they might not have even known existed. If it was everything it claimed to be, it would be the ultimate surveillance tool, and it would open the door to everything from stalking to totalitarian state control. Could it be true? In this riveting account, Hill tracks the improbable rise of Clearview AI, helmed by Hoan Ton That, an Australian computer engineer, and Richard Schwartz, a former Rudy Giuliani advisor, and its astounding collection of billions of faces from the internet. The company was boosted by a cast of controversial characters, including conservative provocateur Charles C. Johnson and billionaire Donald Trump backer Peter Thiel, who all seemed eager to release this society-altering technology on the public. Google and Facebook decided that a tool to identify strangers was too radical to release, but Clearview forged ahead, sharing the app with private investors, pitching it to businesses, and offering it to thousands of law enforcement agencies around the world. Facial recognition technology has been quietly growing more powerful for decades. This technology has already been used in wrongful arrests in the United States. Unregulated, it could expand the reach of policing as it has in China and Russia to a terrifying dystopian level. *Your Face Belongs to Us* is a gripping true story about the rise of a technological superpower and an urgent warning that in the absence of vigilance and government regulation, Clearview AI is one of many new technologies that challenge what Supreme Court Justice Louis Brandeis once called the right to be let alone.
